The Transatlantic Free Trade Agreement (TAFTA)

The Transatlantic Free Trade Agreement (TAFTA) is being negotiated between the Obama Administration and unelected bureaucrats of the so-called "Brussels European Union". Conducted in clandestine, the talks are taking place under heavy influence of the multi-billion dollar global pharmaceutical investment industry.

Under the guise of "free trade" and "international harmonization", these negotiations primarily serve the goal of protecting the trillion-dollar-per-year global business with patented pharmaceutical drugs.

The greatest obstacle towards this goal is the "Dietary Supplement Health and Education Act" (DSHEA) – the law that has guaranteed free access to natural therapies for millions of Americans since 1994.

Every member of the natural health community, every health food store and every American citizen needs to be alerted: TAFTA would inevitably destroy DSHEA!

**SAY NO TO
TAFTA**
