THE NEW YORK TIMES, SEPTEMBER 17, 2003

CALL TO THE UN GENERAL ASSEMBLY CALL TO ALL HEADS OF STATE:

At this critical moment in history - with corporate interests ready to sacrifice our planet - you must

SAVE OUR PLANET NOW!

- Matthias Rath, M.D. -
Over the past few months Dr. Rath has raised his voice repeatedly to unmask the corporate interests behind the Iraq war. His voice has become recognized as a 'Conscience of the World'.

On Sunday, September 7, 2003, in an advertisement in the New York Times, Dr. Rath informed the people and governments of the world that this year's UN GENERAL ASSEMBLY will be the most critical General Assembly since the inception of the UNITED NATIONS half a century ago. Only one day later, on September 8, UN Secretary General, Kofi Annan, called for all Heads of State to "come in person" to this year's UN GENERAL ASSEMBLY.

It is clear that the forthcoming UN GENERAL ASSEMBLY will be a political tribunal against those countries that led an illegitimate war - exposing the Bush and Blair Administrations as being responsible for escalating the current international crisis and as perpetrators of International Law.

UNSOLVABLE PROBLEMS FOR THE BUSH ADMINISTRATION

- Your approval rating is at an all time low and half of the American people no longer trust you.
- Your lack of credibility has become a key political issue during the current Presidential election campaign and it will determine the outcome of these elections.
- You have started a war against International Law which exposes you, your administration as well as the corporate and military leaders associated with you to be held responsible for crimes against humanity - in accordance with International law and the United Nations Charter.
- The reason you provided to the people of the world for starting this war, -Weapons of Mass Destruction in Iraq - is known to be untrue.
- You realize that you have become a political liability to the American people and to the world.
- With the UN GENERAL ASSEMBLY - the Parliament of the World - convening in New York time is running out on George Bush. Even with George Bush deciding to speak at the UN, the world assembly can no longer make concessions about wars of aggression and its own Charter without discrediting itself.

UNSOLVABLE PROBLEMS FOR THE CORPORATE INTERESTS THAT BROUGHT THE BUSH ADMINISTRATION INTO THE WHITE HOUSE

Already on September 13, 1998 the New York Times wrote that George W. Bush was surely a tool of the New World Order and a candidate of the 'Rockefeller-financed Trilateral Commission.' Consequently, the pharmaceutical and petrochemical industry - both key investment industries of the Rockefeller group - became the largest sponsors of George Bush's presidential election. Their key assignment to the Bush Administration was to protect their trillion dollar interests in the pharmaceutical industry against crippling liability law suits and against global credibility deterioration due to the uncovering of their unscrupulous 'investment business with diseases.'

Today - after three years of the Bush Administration in office - their record looks rather sobering:

- They have lost the political credibility and the support of the American people.
- They have driven its closest allies - including Tony Blair - to a credibility crisis they may not survive.
- They have exposed the corporate interests behind the Bush Administration to such an extent that they may also be held responsible for plundering public and private property in violation of international law.
- They have isolated the United States of America from the entire world compromising the US' political and economic leadership.

With this devastating record the Bush Administration has become a liability to the very same corporate interests that brought them into the White House. They know that the Bush Administration must be sacrificed - unless

THEIR OPTIONS LEFT TO STAY IN POWER

In this deadlock situation - with the UN GENERAL ASSEMBLY ready to condemn the perpetrators of International Law - few options are left, including the unthinkable: dragging the world into the abyss with weapons of mass destruction.

Such events would immediately distract from the loss of political credibility, retrospectively justify the war against Iraq and provide the basis for corporate interests to establish global legislation curtailing civil rights and cementing its global control.

The unthinkable may become reality!

**UN GENERAL ASSEMBLY, ALL HEADS OF STATE:
YOU MUST ACT NOW TO PRESERVE WORLD PEACE!**

LESSONS FROM HISTORY

Only few events in the course of history equal the current events. One of them was the termination of the Medieval Times.

Over 400 years ago, a quantum leap took place in history. During Medieval Times 80% of the people were illiterate. The invention of the printing press together with the translation of the bible into spoken languages allowed millions of common people to learn to read and write.

Knowledge was power and the rulers at that time did not want to share their power with the people. They wanted to preserve their feudal economic privileges and met the 'liberation from illiteracy' with utmost brutality. In the '30-Year War' (1618-1648) they destroyed half of Europe and killed millions of people in an attempt to bring back their Medieval privileges. All was in vain because the people no longer wanted to live in illiteracy and dependency.

Today mankind is going through a 'liberation' of similar magnitude - but global in its scope. Two out of three of today's diseases can largely be eradicated if the scientific knowledge currently available in the area of natural *non-patentable* health is implemented in any health care system.

The possibility to liberate mankind from cardiovascular disease, cancer and many other diseases by natural, non-patentable means threatens the very existence of the multi-trillion dollar pharmaceutical investment industry.

Similar to the Medieval feudal rulers, today's economic rulers are not willing to give up their economic privileges voluntarily. Just as they did 400 years ago they are willing to sacrifice the lives of thousands, even millions of people in their own demise.

There is one difference worth noting. Centuries ago, wars were fought with pitchforks and muskets Today they are fought with weapons of mass destruction including nuclear weapons.

All Heads of State, the UN General Assembly as well as millions of people living today in America and in all other countries of the world have to make a decision: Do we really want this to happen? If not, the time to act is now !

The Background

The 58th General Assembly of the United Nations promised to be perhaps one of the most significant moments in the whole history of the United Nations movement. The UN had failed in its constitutional duty to prevent a war of aggression in Iraq and had been seen to be ineffective and incapable of taking decisions on matters of crucial importance to the future security of the majority of countries in the world.

Facing increasing pressure from a United States government forced against its will and in the face of mounting costs to achieve legitimacy for its invasion of Iraq, in order to persuade other countries to share the burden, the UN members were split between those in the majority who wanted nothing to do with illegal activities and the coalition members, most notably the United Kingdom, who stood foursquare behind the US and supported its every action.

The prospect of meltdown within a United Nations organization whose structure does not allow true representation for the majority of its members but rather favors the colonialist tendencies of the handful of permanent members of the Security Council, was very real. And even here, within the main power block of the United Nations, there were deep divisions over the legitimacy of the war in Iraq.

The United Nations organization had to begin to represent the interests of all its members or it would be torn apart by internal strife and its credibility and therefore its effectiveness would be damaged beyond repair. The outdated concept of a limited number of permanent members of a Security Council, the remnants of colonialism, exercising power over 200 other nations was no longer acceptable in the twenty-first century.

The United Nations organization had to begin to represent the interests of all its members or it would be torn apart by internal strife and its credibility and therefore its effectiveness would be damaged beyond repair. The outdated concept of a limited number of permanent members of a Security Council, the remnants of colonialism, exercising power over 200 other nations was no longer acceptable in the twenty-first century.

The Reaction

During his address to the opening session of the 58th General Assembly (Press Office of the Secretary General, September 23, 2003) Kofi Annan opened the door for the United States unilateral action against Iraq to be retrospectively approved and in so doing, sounded the death knell for the United Nations organization.

Annan affirmed his support for retaining the concept of the Security Council but bowed to the strength of feeling within the General Assembly that its membership should be increased. A body that had signally failed in its duty to prevent a war of aggression declared unilaterally by one of its own members was to be retained.

His subsequent announcement towards the end of his speech that he would instruct a high level panel to look into reform of the United Nations organization had a hollow ring. Whilst the views of the vast majority of its members remained unrepresented, any powerful rogue state could again declare war on another member, at will.

The Outcome

The prospect of the world being plunged into a war involving weapons of mass destruction was receding from the high probability levels of early 2003.

The United Nations was seriously wounded by the experience, but managing to limp along with the help of some superficial first aid in the form of a high level review and soothing words.

As the year drew to a close, the financial interests behind the pharmaceutical industry were gearing up for the big one - the re-election of their boy to the White House in 2004 and the continued push for protection and expansion of their fraudulent 'business with disease.'

THE NEW YORK TIMES, SEPTEMBER 7, 2003

TO ALL HEADS OF STATE TO ALL VOTING MEMBERS OF THE UNITED NATION'S GENERAL ASSEMBLY!

Over the past few months Dr. Rath has raised his voice repeatedly to unmask the corporate interests behind the war against Iraq.

His voice has become recognized as a 'Conscience of the World'.

Matthias Rath, M.D.

THIS YEAR'S UN GENERAL ASSEMBLY DECIDES ON THE FUTURE OF THE UNITED NATIONS, WORLD PEACE AND THE FUTURE OF MANKIND!

- When the UNITED NATIONS GENERAL ASSEMBLY meets this year it will have to make decisions that determine the future of the United Nations as the Parliament of the World, the course of world peace and thereby the future of mankind. Since the foundation of the United Nations more than half a century ago, no UN GENERAL ASSEMBLY has ever been more significant.
- The Bush-Administration knows that, as do all other governments that made the fateful decision to join a war led in open violation of International Law and by lying to the entire world. They know that the world community cannot and will not tolerate their actions. The background to their diplomatic frenzy in the UN Security Council is their fear of the UN GENERAL ASSEMBLY's decisions later this month.
- The fact is, if the UN GENERAL ASSEMBLY allows the UN Security Council to cave in to US pressure and - retrospectively - legitimize the attack war against Iraq, it will have destroyed the very basis of the United Nations existence - to ban all wars of aggression.
- Instead of granting immunity to those politicians responsible for starting illegal wars of aggression you must bring them to justice before the International Criminal Court (ICC) in The Hague which started its work this year with precisely that purpose. If you don't act now, the corporate interests behind these politicians will continue to threaten world peace for generations to come.
- The Heads of State of the close to 200 nations of the world must now act together to initiate Proceedings at the ICC in order to protect the most valuable asset mankind has to preserve world peace: the United Nations system of International Law and the UN Charter.

The United Nation's
International Criminal Court
in the Hague

IN THE NAME OF THE PEOPLE OF THE WORLD AND FOR ALL FUTURE GENERATIONS - YOU MUST ACT NOW TO PRESERVE WORLD PEACE!

More Information: www.dr-rath-foundation.org

The Background

As the opening of the annual General Assembly of the United Nations approached, United States efforts in lobbying for legitimacy amongst the Security Council members increased markedly.

Seven months into a war that was only supposed to have lasted a few weeks questions were already being asked at many different levels about the veracity of the reasons given by President Bush for the invasion of Iraq. No weapons of mass destruction had been found and the pre-emptive strike option appeared to be increasingly unjustified.

World affairs were rapidly approaching a crucial juncture that would determine the future of the United Nations and the legitimacy of a world body whose main purpose was to prevent wars of aggression - something it had signally failed to do in the case of the United States invasion of Iraq.

The protection of the financial interests behind the pharmaceutical industry had been the driving force behind these events right from the outset and now, the UN was at crisis point. Somebody had to make a clear statement of the realities.

The former UK Environment Minister Michael Meacher was the first government 'insider' in a long line of UK/US officials unmasking the public deception of the Iraq War.

the leaders of the permanent members of the Security Council at a summit meeting in Geneva within the week. Furthermore, Annan announced that he would outline plans for reform of the United Nations at the annual General Assembly in a few days time and that only "radical" revisions to the institution were likely to preserve it.

A former Environment Minister in the cabinet of Tony Blair wrote a stinging critique of the war on terror calling it "bogus" and simply a pretext behind which the real goals of the United States were being pursued.

The Outcome

It appeared that our open letter program had not been in vain. Apart from the crucial effect of denying the Bush Administration the opportunity to covertly support the financial interests behind the pharmaceutical industry, our campaign had helped to make the use of weapons of mass destruction and another world war a remoter possibility.

Judging by the reactions that followed this open letter, it appeared that the secretariat of the United Nations must also have been following the unfolding debate.

The Reaction

The day after the publication of our open letter, the Secretary General of the United Nations, Kofi Annan, called a press conference at the UN headquarters in New York (UN Press Release, September 8, 2003).

During a wide ranging session, Annan indicated that he wanted to meet with

Richard Clarke, the former top Anti-Terrorism Advisor of George W. Bush became one of the most prominent government officials exposing the reasons for the War on Iraq as the 'Big Lie.' His book: „Against All Enemies: Inside America's War on Terror“ has become a New York Times bestseller.

Black Out Through Blackout?

On August 14, 2003, New York City - the seat of the Parliament of the World, the United Nation - and other cities in Northeastern America covering the main distribution area of *The New York Times* were hit by a sudden power **BLACKOUT**. On that very same day, *The New York Times* had published as an advertisement my recent Public Appeal that the world community needed to bring to justice those politicians that threatened the very existence of the United Nations, its Charter and its Code of International Law.

Coincidence? Imagine, what would you have done if you had been in the shoes of those politicians in Washington who used the tragic events of September 11 to their advantage and lied to the people of America and the World about the Iraq War? These special interest groups are in the worst crisis ever. They have lost their political credibility around the world, and they hold on to power with the skin of their teeth. Undoubtedly, these political and corporate special interests were the largest benefactors of the **BLACKOUT**.

My Public Appeal advertisement in *The New York Times* on August 14 was triggered by the efforts of these groups to retrospectively - seek UN approval for their War against Iraq. My Call to the Governments of the World to "Just Say No!" in my advertisement in *The New York Times* on August 14 dragged this unscrupulous plan into plain daylight.

I called upon the **United Nations General Assembly** to hold those politicians and the corporate interests they represent responsible for their actions. I called for the prosecution of these politicians for their breach of international law by leading a war without any international mandate in the very Court specifically set up for that purpose - The International Criminal Court (ICC) in The Hague.

I called upon the United Nations General Assembly and the **Heads of States of about 200 nations** of the world to join now to protect the most valuable asset mankind has to preserve world peace: the United Nations System of International Law and the UN Charter.

If you were in the shoes of these politicians, this BLACKOUT served your goals in several ways:

... **BLACK OUT** the attention of the readers of *The New York Times* and the People of America, millions of whom are already doubting your credibility.

... **BLACK OUT** the UN ambassadors of almost 200 nations in New York City and disrupt communication lines with their governments at home in order to prevent their coordination.

... **BLACK OUT** to gain more time. Only five days later, on the eve of the UN Security Council meeting, the UN headquarters in Iraq was destroyed by a bomb. This event is immediately being abused by the Bush and Blair administrations to coerce the United Nations into a further Iraq commitment. Their goals are obvious: to retrospectively legitimize the Iraq War, to avoid prosecution at the International Criminal Court for breach of international law and to have the United Nations dismantle its own Charter and system of International Law.

Think about it: You are dealing with the same corporate interest groups who **BLACKED OUT** millions of Americans in the ENRON scandal - before they were voted into the White House. The same special interest groups **BLACKED OUT** the official report about September 11 and **BLACKED OUT** the truth about the war against Iraq - a war that killed tens of thousands of people and violated International Law and the UN Charter.

These lies and **BLACK OUTS** serve special corporate interest groups and their political stakeholders. **If the people and the governments of the world do not expose these interests and hold them responsible, they will continue to threaten world peace for generations to come!**

Dr. Rath's Appeal advertisement in *The New York Times* on August 14, 2003, the day of the Black Out.

I CALL UPON ALL MEMBERS OF THE UNITED NATIONS:

DON'T LET THE UN CHARTER BE DESTROYED!

If the United Nations General Assembly lets the UN Security Council cave in to U.S. pressure and - retrospectively - legitimize the attack war against Iraq, it will have destroyed the very basis of the United Nations' existence - to ban all wars of aggression.

IN THE NAME OF THE PEOPLE OF THE WORLD FOR THIS GENERATION AND FOR ALL FUTURE GENERATIONS: THIS MUST NEVER HAPPEN! YOU MUST SAY NO!

Instead of granting immunity to those politicians responsible for starting wars of aggression, you must hold them responsible at the International Criminal Court (ICC) in The Hague, which started its work this year with precisely that purpose. If you don't act now, the corporate interests behind these politicians will continue to threaten world peace for generations to come.

DON'T LET THEM GET AWAY WITH IT!

The Heads of States of the close to 200 nations of the world must join now to protect the most valuable asset mankind has to preserve world peace: the United Nations system of International Law and the UN Charter.

Act Now: Visit www.dr-rath-foundation.org or call (800) 648-7171

SAVE THE UN CHARTER - SAVE WORLD PEACE!

Matthias Rath, M.D.

**JUST
SAY
"NO!"**

Advertisement

The Background

Having achieved some success in arranging 'immunity pacts' with other countries in order to protect themselves from prosecution for war crimes, President Bush and the members of his Administration began to increase pressure on the United Nations for legitimization of its invasion of Iraq.

The inability of the United Nations to prevent the United States from taking the law into its own hands and invading Iraq had damaged the credibility of the venerable institution so much that its founding constitutional principles were compromised. The UN's continuing weakness in the face of US aggression did nothing to improve that perception.

As the opening date of the 58th General Assembly of the United Nations approached, we felt the likelihood that the United Nations might cave-in over Iraq was very real and that retrospective legitimization of the Iraq war could be the final straw.

On August 14, 2003, we published a half page open letter in the New York Times addressing these important issues. The message was apparently right on target and someone at the 'levers of power' must have got scared.

The Reaction

On this 14th of August, the very same day our call to the UN-members „Don't let the UN-Charter Be Destroyed!“ was published in the hometown of the UN (see bottom part of adjacent page), the whole of the readership area of the New York Times was suddenly blacked out. The impact was obvious: None of the thousands of UN-officials from almost 200 nations present in New York on that day was able to communicate this important message to their governments at home. Was this a coincidence?

We no longer believed in coincidences and decided to publish the adjacent full-page open letter in the New York Times on August 24, 2003. Our message to those with their hands on the levers of electrical – and political – power was clear: switching off electricity cannot hide the truth!

Four days later, on August 19, the United Nations mission in Baghdad was bombed and the UN's chief envoy and at least 16 other people were killed.

The Outcome

Following the bombing of the UN mission in Baghdad, the United Nations withdrew its presence from Iraq altogether. The attitude of many UN member countries towards the United States position hardened as a result of the attack, which many felt need not have happened had the US obeyed international laws.

The need to seek legitimacy for the war on Iraq became ever more important to the United States, because of the escalating costs - not only in lives lost - but financially and in terms of aid requirements if the shattered country were ever to be rebuilt. Without UN sanction, it would be hard for the United States to attract more partners to share the increasing burden.

It was important that the debate was kept alive in the minds of readers in order to counteract the tactic used by the Bush Administration throughout the whole war on Iraq of lying to the public about the facts behind crucial issues.

THE NEW YORK TIMES, JULY 16, 2003

CALL TO THE PEOPLE OF AMERICA!

SAY "NO" to Nuking Iran or North Korea to Cover Up the Lies About September 11 and the Iraq War!

With the political credibility of the Bush Administration at an all-time low - you may set your watch for a "surprise." The people of America and the world must speak out NOW!

Matthias Rath, M.D.

SEPTEMBER 11, 2001

The first crippling wave of class action lawsuits against a major drug maker followed BAYER's "Baycol" scandal. "September 11" happened within only weeks! 2,600 innocent people died in this tragedy.

And yet more than 2600 US Hospital patients die every 9 days from the side effects of prescription drugs. (source JAMA page 1204 vol 279 #15)

Over the past months, I have alerted the people of America and the world again and again that "September 11" and the "war against Iraq" were being abused by corporate interest groups - above all the pharmaceutical and petrochemical industries. Their primary goal is to deliberately escalate an international crisis and create a global "state of fear" that can then be abused to curtail human rights and pass corporate protectionist laws.

The primary benefactor of this strategy is the pharmaceutical industry. "September 11" followed the "Baycol" scandal by only four weeks! Without the "distraction" of the September 11 tragedy, this investment "business with disease" would have been buried by now under an avalanche of class action lawsuits, and the largest investment industry would already be gone!

People in America now realize that they have voted the political stakeholders of the special interests behind ENRON, BAYER, PFIZER and other global players into the White House, and they are waking up to the nightmare that these interests won't hesitate to sacrifice our planet purely for corporate greed. As a direct consequence of this realization, the credibility of the Bush Administration is gone and the demands for resignations are rising.

You could have set your watch to precisely this moment when we would once again be faced with stories about weapons of mass destruction in Iran and North Korea along with a new threat from Al Qaeda.

There are lessons to be learned from history: Once before, the secret service of a nation was involved in staging events on behalf of corporate interest groups and their political stakeholders. Because no one stopped those interest groups then, they led the world into the Second World War.

THE NEXT WORLD WAR WILL BE THE LAST ONE! THE TIME TO ACT IS NOW!

FEBRUARY 28, 1933

The German Parliament building, the Reichstag, was set on fire. This event delivered the pretense for the transformation of a democracy into a dictatorship.

The 1946 Nuremberg War Tribunal established that without the influence and financial backing of the European petrochemical/pharmaceutical cartel IG Farben, World War II would not have been possible.

The Background

Having declared an end to major combat operations on May 1, after taking the decision to go it alone against all international law, the Bush Administration was beginning to talk about the possibility of pre-emptive strikes against other countries - Iran and North Korea in particular.

January 30, 2002

In Speech, Bush Calls Iraq, Iran and North Korea 'an Axis of Evil'

By DAVID E. SANGER

WASHINGTON, Jan. 29 — President Bush told Americans tonight that "our war against terror is only beginning" and sent new warnings to terrorists around the world and to three nations — Iran, Iraq and North Korea.

Using unusually strong language, he charged that "states like these and their terrorist allies constitute an axis of evil," choosing a word once used to describe the alliance of Germany, Italy and Japan during World War II.

New York Times' report about Bush's January 2002 State of the Union address.

The only way for the pharmaceutical cartel to continue its global fraud business is to curtail civil rights and rule – if necessary – even against the health and life interests of millions of people.

To create a pretence for such laws, the escalation of international crises has been a hallmark throughout the Bush Administration and continues until today.

The threat of the use of weapons of mass destruction was again central to their argument and provided the psychological pressure required in order to sustain the state of emergency, under cover of which the real plans could be advanced. There was a very real possibility of the world being plunged into another war by President Bush's illegal actions.

With SARS officially contained, the Iraq war 'over' and the covert strategy behind the war exposed to the glare of public scrutiny, President Bush needed a new cover under which to operate and threatening to

make pre-emptive strikes against other 'terrorist' nations harboring weapons of mass destruction fitted the bill nicely.

The Reaction

After refusing to recognize the jurisdiction of the United Nations International Criminal Court over United States citizens, the Bush Administration decided to further bolster its case by threatening to withdraw military assistance from any country that didn't support this position.

The countries that succumbed to this threat were then forced to sign an 'immunity pact' with the United States, guaranteeing freedom from prosecution for United States personnel. The

president would later go on to take this much further and seek retrospective legitimization for the war on Iraq from the United Nations.

On the same day that our open letter was published, General John Abizaid announced that soldiers replacing troops in Iraq from that point onward may be deployed for year-long tours. So much for the end of combat operations.

The Outcome

Things were going badly for the United States in Iraq and the danger was very real that President Bush would spring a surprise attack elsewhere in order to divert attention at home from the rising US troop casualties, particularly as he had originally announced that the invasion of Iraq would be a short, surgical strike.

Our open letter exposed this tactic and called upon the people of America to say no and by doing so, lessened the possibility of such a surprise attack taking place – an attack that would inevitably lead to the use of weapons of mass destruction, as President Bush knew only too well.

CONSTITUTION for a Healthy and Peaceful World

Today the people of the world realize that they were deceived about the true reasons behind the war on Iraq. Those politicians who started this illegal war have lost all credibility. Yet some heads of states are already compromising with those who continue to escalate the international crisis. By doing this, they act against the will of their own citizens.

Over the past weeks I have informed the people in America and the rest of the world about the hidden agenda behind the war against Iraq. There are at least two battlefields:

BATTLEFIELD NO. 1:
This is the struggle of the pharmaceutical investment industry for the survival of its 'business with disease'. This battle is not immediately recognizable for everyone. At stake are not millions or billions of dollars - but in the long term hundreds of trillions of dollars.

Once people around the world recognize the organized deception underlying the pharmaceutical industry, they will demand to put an end to such a business and hold its directors, investors and political supporters accountable. In order to prevent this from happening, this multi-trillion dollar investment business needs worldwide emergency legislation and protection laws, which could never be passed in peacetimes. For this very reason its political stakeholders are organizing a second battlefield:

BATTLEFIELD NO. 2:
This is the psychological, political and military escalation of crisis and war at a global scale. The main purpose of this strategy is to divert attention from the 'Battlefield No. 1', create a global psychological state of fear as a precondition for abandoning civil rights and implementing protection laws to win the main battle. It is precisely for that reason that this second battlefield is

being openly implemented now and escalated on a global scale.

The strategic aim of these special interests around the Rockefeller investment group and their political stakeholders is to escalate the current international crisis to a level where weapons of mass destruction are used.

The use of weapons of mass destruction would immediately cause a global psychological paralysis. Such a situation is the only scenario in which it would be possible to curtail civil rights and establish the required protection laws not only in one country - but worldwide.

This is why we do not live in post-war but in pre-war times. And this is why the people of the world need to unite in order to prevent this from happening. The time has come to start building a new world of peace, health and justice.

Matthias Rath, M.D.

THE PEOPLE'S AGENDA

Constitution for a New World of Peace, Health and Social Justice

At the beginning of the third millennium mankind stands at the crossroads. On the one hand are the interests of six billion people currently inhabiting our planet - and of all future generations - who wish to live a dignified and healthy life in a peaceful world. On the other hand is a small corporate interest group denying the whole of mankind these basic human rights for one reason only - financial greed.

In this situation, we, the people of the world, have the choice: we either continue accepting the yoke of those investment industries forcing wars and diseases upon us or we liberate ourselves from these burdens and start building a world determined by the principles of peace, health and social justice.

We, the people of the world, recognize that never before in the course of history have we been more united to preserve peace, to terminate the investment 'business with disease' and to bring to justice those who sacrifice peace and health for corporate gain.

Therefore, we the people from East and West, North and South, from rich and poor countries have decided to create a world of peace, health and social justice for ourselves and generations to come.

As our fundamental rights we proclaim:

THE RIGHT TO PEACE. We, the people of the world, are determined to defend our right to peace with all means available. In the age of weapons of mass destruction war is no longer an option for solving international conflicts. We will make sure that those who conduct wars without an explicit mandate by international law will be held responsible and will be brought to justice. We will not rest until this is accomplished because we recognize that this is the only way to protect our planet from destruction.

THE RIGHT TO LIFE. We, the people of the world, are determined to defend our right to life with all peaceful means available. We will not rest until all factors shortening the life span of people on our planet are eliminated. We will fight hunger, malnutrition and other factors already killing millions of inhabitants of our planet each year including infants and children. We will also terminate the 'investment business with disease' as the result of which more people have died prematurely from preventable diseases than in all wars of mankind put together.

THE RIGHT TO HEALTH. We, the people of the world, are determined to defend our right to health with all means available. We will make sure that the pharmaceutical 'business with disease' the deliberate promotion of diseases for corporate gain, is outlawed worldwide. We will hold responsible those who deliberately promote diseases and those who withhold live-saving information on natural, non-patentable therapies. In providing health to our communities and in implementing national health care programs we will focus on effective and safe, natural health approaches. The primary goal of any health care strategy is prevention and eradication of diseases.

THE RIGHT TO SOCIAL JUSTICE. We, the people of the world, are determined to defend our right to social justice with all peaceful means available. We no longer accept that two out of three inhabitants of our planet live in poverty and illiteracy. We will make sure that the resources of the world are redistributed in a way that provides education and a dignified life for every citizen of our planet. To finance this redistribution we will use the financial resources liberated from terminating the multi-trillion dollar 'business with disease' and from decreasing military expenditure.

We recognize that as a precondition to establish these important human rights those interest groups promoting war and disease need to be brought to justice in international courts for sacrificing the lives of millions of people and for committing other crimes against humanity.

This will remove the last obstacle for the people of the world to terminate the 'Dark Ages of Disease, War and Injustice' and start building a 'New World of Peace, Health and Social Justice'.

On behalf of the people of the world -

Matthias Rath, M.D.

More information how you can support this Constitution and help disseminate it is available at www.dr-rath-foundation.org.

WHAT WE, THE PEOPLE, MUST DO

"All that is required for evil to prevail is for good men to do nothing." Edmund Burke, Politician and Writer (1729-1797)

WHAT HAS HAPPENED

My Open Letters in the New York Times and other leading international newspapers before the Iraq war contributed to the accomplishment of two goals. First, the public exposure of the pharmaceutical agenda behind this war helped to deny any mandate by international law for this war. Secondly, I publicly warned that any use of weapons of mass destruction could be abused. If such a plan had ever existed, my warning exposed such intentions and rendered them too risky to execute.

Moreover, only 11 days after my first Open Letter was published in the New York Times on February 2 this year, the Attorney General of New York filed lawsuits against leading pharmaceutical companies for fraudulent business practices. On March 31, Europe's leading weekly newspaper 'Der Spiegel' called the pharmaceutical business an organized fraud scheme, British TV aired 'Dying for Drugs' and on May 18 the New York Times published a groundbreaking article 'Trial Lawyers Are Now Focusing on Lawsuits Against Drug Makers'.

Thus, while the Bush administration won a war in Iraq militarily they lost their credibility and they are about to lose their main battle that is being fought on behalf of the pharmaceutical cartel.

THE PHARMA CARTEL'S NEXT STEPS

Because they did not reach their goals during the Iraq war, these special interest groups and their political stakeholders will continue to escalate the international crisis.

However, because their 'game plan' is now revealed, their next steps are predictable. Most importantly, because we, the people, now know these plans, we have a chance to stop them. These plans include:

- The war escalation - including the threat of preemptive nuclear strikes - against Iran, North Korea and other countries.
- The escalation of collateral psychological wars such as the 'anti-terror war' and the global scare campaign on SARS.
- Efforts in the US-Congress to pass protection laws for drug makers, including those providing immunity from drug liability law suits under the umbrella of Homeland Security.

If the people in America allow these plans to proceed, free and democratic elections in November 2004 are threatened.

Until then, all peace talk has to be tested to see whether it is genuine or just another deception.

WHAT WE MUST DO NOW

Take Health Action:

The pharmaceutical industry promotes the expansion of diseases - not their prevention. For more and more diseases there are effective natural, non-patentable alternatives.

Every family, every doctor's office, hospital or health care system that applies natural therapies helps to improve health and decrease the dependency from the pharmaceutical investment business. Entire countries are already refocusing their national health care system on preventive measures including natural and nutritional health.

With every dollar less, the ability of this interest group to manipulate public opinion and to buy political influence diminishes. Every dollar less for the pharmaceutical cartel makes the next war less likely.

Take Political Action:

- Share this information with others.
- Support the 'People's Agenda' and start implementing it in your community.
- Demand from your political representatives to implement the 'People's Agenda.'

COME TO 'THE HAGUE'

The People's Agenda will be formally presented at an international conference in The Hague, Netherlands on June 14 - 15, 2003. The Hague is the city where the United Nation's International Criminal Court (ICC) has been established.

Dr. Rath in front of the ICC in The Hague

This international conference is open to public participation. For more information and pre-registration please visit our website.

More information: www.dr-rath-foundation.org

Here you can also express your support for 'The People's Agenda' and get lists to collect signatures in its support.

The International Criminal Court in The Hague, Netherlands, established by the UN to prosecute war crimes and other violations of international law.

The Background

"All that is required for evil to prevail is for good men to do nothing" – Burke's famous quotation was never truer than during the first half of 2003.

Whilst most of the world's leaders were opposed to the illegal war on Iraq conducted by the US-led coalition, little was done to stop it happening. Inaction on the part of the United Nations and world leaders gave President Bush an almost free hand to push ahead with his covert strategy, so clearly exposed in our earlier publications. Unless somebody called a halt and brought these criminals to account, who could tell what they might then be capable of if left to act unchecked?

Breaking new ground for the Foundation and accepting the mantle of responsibility created by our outspoken criticisms of President Bush, Prime

Minister Blair and the pharma-Cartel, we decided to hold a tribunal in The Hague in the Netherlands, the seat of international law. The tribunal would call for the perpetrators of the Iraq war and the 'business with disease' to be tried for their crimes, which would be laid out in an historic document to be called 'The Hague Complaint.' A series of three open letters in June formed part of this action.

In line with our normal approach to these matters, we knew that it would not be sufficient simply to call for the perpetrators of these crimes against humanity to be brought to justice, without providing an alternative to their 'business with disease.' Consequently, our first act was to publish 'The People's Agenda' offering a constitution for a new world of peace, health and social justice, clearly defining the battlefield.

The complete text of the complaint is documented at the end of this book.

The Reaction

Within five days of our historic Hague Complaint being lodged with Senor Ocampo, the Chief Prosecutor of the International Criminal Court in The Hague, President Bush and his main coalition partner Tony Blair were openly accused of war crimes in Belgium (Agence France Presse, June 20, 2003).

A few weeks later, echoing our own action, the Athens Bar Association delivered a legal complaint of genocide, crimes against humanity and war crimes against Tony Blair and other senior members of the UK cabinet to the Chief Prosecutor of the International Criminal Court in The Hague.

The Outcome

After Donald Rumsfeld threatened to move NATO headquarters out of Brussels, the Belgian government eventually caved in to pressure from the accused. By retrospectively changing the universal genocide law under which the case against Tony Blair and others had been brought, the Belgian government were able to throw out the case, simply saying that it had no jurisdiction to try them (Deutsche Welle, September 25, 2003).

The International Criminal Court was slow to get its house in order and did not officially acknowledge receipt of our Hague Complaint until a year later. At the time of going to press, the Court is still considering whether or not to accept the case for further investigation and eventual trial. Whatever the outcome of this process, the Hague Complaint remains a unique indictment of the perpetrators of the 'business with disease' and its supporters.

THE NEW YORK TIMES, APRIL 2, 2003

VITAMIN C AGAINST SARS

PUBLIC HEALTH INFORMATION

**What everyone should know
- but the WHO does not tell you -
about *natural* protection from the new epidemic**

The people of Hong Kong, Asia and around the world are afraid of the Severe Acute Respiratory Syndrom (SARS) Virus. But is this fear really justified? It is a scientific fact that all viruses that have been investigated can be blocked by specific essential nutrients. The natural substance **ascorbic acid (vitamin C)** is known to decrease or completely block the replication of all viruses it is applied to. Viral diseases are essentially unknown in the animal world, because most animals - as opposed to man - produce high amounts of vitamin C in their body. Moreover, all viruses spread in the body by using the same enzymes (collagenases) which can be partially or completely blocked by means of the natural **amino acid lysine**. Several clinical investigations also document the beneficial role of **vitamin A** and other essential nutrients in enhancing the immune system. For further references we encourage you to visit our Foundation website.

The fact that there are natural substances available to help protect millions of people from SARS must be disseminated world wide immediately. These natural substances are not only effective but also without any side effects and - most importantly - available anywhere in the world right now.

In this situation the people of the world look towards organizations responsible for global health issues for help and advice. But they are disappointed. The fact that the World Health Organization (WHO) is failing so seriously in disseminating live-saving information on natural, non-patentable health measures is no coincidence. It reflects the fact that the WHO is not primarily serving the health interests of the people worldwide but is apparently influenced by the interests of their largest corporate sponsors - the pharmaceutical industry. This investment industry is based on the sales of patentable synthetic drugs.

The fact that the life-saving information about natural health measures to fight the SARS epidemic is withheld from the people of the world is irresponsible and must be stopped immediately. The people of the world can no longer tolerate the fact that their health and lives are sacrificed to the trillion dollar pharmaceutical "business with disease" based upon patentable drugs.

I call upon every person, every health professional and every government official to familiarize themselves with the scientific facts about the use of vitamins in the fight against viral diseases including SARS.

Sincerely yours,

Matthias Rath, M.D.

Dr. Rath is the world-renowned scientist and physician who led the breakthrough in the natural control of some of today's most common diseases. The late two-time Nobel Laureate Linus Pauling (left) - himself a pioneer in vitamin research - considered Dr. Rath as his successor.

With this public health service Dr. Rath wants to help the people of Hong Kong, Asia and beyond to learn about natural protection from SARS, improve their health and decrease their dependency upon the unscrupulous pharmaceutical industry 'business with diseases.'

This public health service to the people of Hong Kong and Asia was supported by the Dr. Rath Health Foundation and by thousands of people worldwide who have already been helped by natural therapies.

DID YOU KNOW ?

Ascorbate (vitamin C) has been shown to decrease the replication (multiplication) of the HIV / AIDS virus by more than 99% in a landmark study published in one of the most influential scientific journals, the *Proceedings of the Academy of Sciences, USA?*

PNAS 1990;87(18):7245-49.

More Information: www.dr-rath-health-foundation.org

The Background

As the war in Iraq rumbled on without apparently achieving anything, the diversionary tactic element of the campaign was waning. To compensate, media interest in the SARS 'epidemic' was showing little sign of abating. Regular updates from the World Health Organization helped create the impression of another war that could have much wider implications than the one in Iraq.

With quarantined areas regularly featuring in the news, the panic that this disease caused helped to maintain the psychological state of fear desired by the Bush Administration. Failing to exploit the war on terror in the way that had been planned, because of the intervention of our open letter campaign, made SARS a godsend for President Bush. His plans to realize the goal of introducing laws to protect an industry that profits from death and disease took on anew lease of life.

As part of this process (and we can think of no other reason why this information should have been withheld) scientific knowledge that would enable SARS to be brought under control quickly and economically – namely the fact that vitamin C can block the replication of any virus that it is applied, was deliberately being kept from the public's attention.

The pharmaceutical cartel uses several strategies to activate the emergency laws it needs to survive. Beside the escalation of nuclear crises, the promotion of the global 'war on terror' it has continuously built up a third scare tactic: the threat of biological warfare. SARS and the 'bird flu hysteria' are typical examples of this unscrupulous strategy.

The Reaction

Once we realized that this remedy was not going to feature in the World Health Organization's plans for the control and eradication of SARS, we felt a certain responsibility to put it directly into the hands of the people, in order that they might save themselves.

It took a little time for this information to spread around the world, but by publishing the keys facts in several of the countries most affected by the 'epidemic' (notably China where the outbreak had originally taken hold) we were able to achieve this goal. Anecdotal reports at the time suggested that vitamin C very quickly became in short supply in these countries.

By mid-June, the World Health Organization could no longer sustain SARS as an 'epidemic' and Director General Gro Harlem Brundtland announced to a meeting of 1000 world experts gathered in Kuala Lumpur that SARS had been brought under control.

The Outcome

A clear statement of simple scientific truths had opened the eyes of many to the real meaning of a world event portrayed in the media as threatening and dangerous. By making the hidden visible, the threat of unknown dangers receded rapidly.

The power of the proposals contained in our 'Health for All by 2020' program had been graphically demonstrated by the effects of this public education initiative, which showed how easily diseases could be maintained through suppression of scientific facts.

THE NEW YORK TIMES, APRIL 2, 2003

Make Health - Not War!

The war against Iraq has just started and there is already a winner: the people of the World. Over the past weeks we have informed the people in America and the rest of the World about the background of this war and its main corporate benefactor - the pharmaceutical industry.

This information was first published in 'The New York Times', in the city where political leaders had congregated at the United Nations over the recent months like rarely before in history. International tension and the escalation to war created a climate where the information about the pharmaceutical industry as the main benefactor of the 'war against terrorism' spread like a bush fire.

The global spread of this information was also an important reason why small countries in the Security Council - unexpectedly - resisted the pres-

sure by the United States and British administrations, denying them any mandate and any support by international law for their war.

Now, the war led by the Bush and Blair administrations can no longer reach its primary political and economic goal - that is to impose the monopoly of the multi-trillion dollar pharmaceutical investment business with disease on the people of this planet for generations to come.

As the scientist whose discoveries enable us to control today's most common diseases by natural means and having unmasked the corporate benefactors behind the current war, I consider it my responsibility to issue a call to the people and the political leaders of the world to immediately start building a 'World without Disease'!

"One day there may even be wars just to prevent your breakthrough from being widely accepted," said two-time Nobel Laureate Linus Pauling shortly before his death in 1994 to Dr. Rath.

Call to Action to the Heads of States and the People of the World.

Health for All by the Year 2020

Mankind now has an unique opportunity to liberate itself from today's most common diseases.

A BREATH-TAKING PERSPECTIVE

- **Cardiovascular disease** has been identified as the result of a structural impairment of the blood vessel wall similar to the sailor's disease scurvy. Optimum supply of vitamin C and other micronutrients that stimulate the production of collagen - the vascular reinforcement molecules - is an effective, safe and affordable way to prevent heart attacks and strokes. Thus, the number one cause of death in the industrialized world today can largely be eradicated in this and future generations.

Global implementation of this scientific knowledge will save millions of lives, billions in health care dollars and eliminate the trillion-dollar pharmaceutical business with cardiovascular disease.

- **High blood pressure, heart failure, irregular heart beat, and diabetic circulatory problems** are primarily the result of long-term micronutrient deficiencies impairing the function of millions of cells that compose the heart muscle and the blood vessel walls.

Global implementation of this scientific breakthrough will save millions of lives, billions in health care dollars and eliminate the trillion dollar pharmaceutical business with these diseases.

- **Cancer**, the second most frequent cause of death in the industrialized world is no longer a death verdict. All cancer cells spread by using the same mechanism. They produce massive amounts of collagen-digesting enzymes capable of paving their way through the human body during cancer spread.

Effective, safe and affordable micronutrients such as the amino acid lysine, vitamin C and other specific nutrients block these enzymes and thereby impede cancer disease without any side effects.

Global implementation of this scientific breakthrough will save millions of lives, billions in health care dollars and eliminate the trillion dollar pharmaceutical business with cancer.

- **Infectious diseases, AIDS and other epidemics** are the leading cause of death in the developing world. B-vitamins and other essential nutrients regulate the production of white blood cells and optimize immune system function in the fight against tuberculosis and other epidemics. Moreover, vitamin C alone has been shown to reduce the multiplication of the AIDS virus to less than 1% of its normal rate. This simple vitamin is more effective than any combination of expensive pharmaceutical drugs.

Global implementation of this scientific breakthrough will save millions of lives, billions in health care dollars and eliminate the trillion dollar pharmaceutical business with AIDS and other infectious diseases.

In summary, today's most common diseases can now be largely eradicated by natural therapies, thereby improving human health globally and terminating the pharmaceutical investment business with disease.

WHY THIS DID NOT HAPPEN EARLIER

At the beginning of the 21st century mankind wakes up to a nightmare. A hundred years ago the Rockefeller Group, already controlling the global oil business at that time, defined another global investment market: the human body and the diseases it hosts.

The return on their investment became dependent on the patentability of drugs and the respective patent royalties. Under the umbrella of 'philanthropy' and 'benefactors to mankind' the greatest deception in the history of mankind was strategically developed.

Every country that focuses its health care system on effective, natural, non-patentable health approaches is an important step towards a healthier and more peaceful world.

You can follow the liberation of mankind from the yoke of the pharmaceutical 'investment business with disease' on the Website of our Foundation.

Millions of patients were promised a 'cure' for their health problems, but the vast majority of the 'remedies' sold had no proven efficacy, at best they covered symptoms. By triggering an epidemic of new diseases from drug side-effects, these deceptive products constantly expanded the 'disease market'.

A strategic precondition for this new market was the elimination of 'competition' from effective natural therapies. The basic knowledge about the essential nutrients required for optimum cellular metabolism was systematically eliminated from medical schools, the textbooks of medicine and from the minds of generations of doctors.

Over several decades the pharmaceutical business with disease became the largest investment industry on planet earth. The huge profits were used to gain influence in all areas of society, including science, medicine, media and politics. Even the largest international bodies did not resist its influence.

WE NEED A NEW WORLD HEALTH ORGANIZATION

The World Health Organization was founded more than 50 years ago to promote health on a global level. A first focus was to improve health through nutrition, including micronutrients. Within two decades the influence of the pharmaceutical cartel had shifted this focus. By abusing the WHO and other UN organizations (e.g. 'Codex Alimentarius') this industry is trying to impose global protection laws to protect and promote the pharmaceutical investment business with patented drugs from being eliminated by mostly superior, but non-patentable natural therapies.

As the direct result of this silent 'take over' of control of global health care by the pharmaceutical industry during the past century, hundreds of millions of people have died from diseases that could have vanished long ago - if not for the multi-trillion-dollar pharmaceutical investment 'business with disease'. Today, more than two billion people suffer from micronutrient deficiencies in the developing world alone. Thus, all of us must now work towards building a new world health organization that liberates us from today's most common diseases.

WE NEED A NEW HEALTHY AND PEACEFUL WORLD

Health is a basic human right. We, the people of the earth will not allow this right to be withheld from us any longer. We will not rest until the right to health - particularly the unrestricted access to natural therapies - has become a human right for all people of the world, guaranteed by national and international constitutions.

I call upon every person on earth: No matter where you live and what you do you should start building this new world right now! Every living room, every doctor's office or hospital, every school, university, community center, every education text book or movie that promotes natural health is a first step towards creating a healthier world. By constructing this new world we not only eliminate entire diseases but also release billions of dollars in funds that are currently wasted for promoting disease and destruction.

I call upon the political leaders to implement natural health as the basis of a prevention-oriented national health care policy. Now that this scientific knowledge is available around the world, you must use it to improve the health of your people. Every country that redirects its health care towards natural health is a quantum leap forward towards a common goal: Health for All by the Year 2020.

There is no time to be lost!

Sincerely,

Matthias Rath

"You have the choice to live in today's world of disease and war. Or you can help build a world of health and peace. For this new world you need to stand up!"

Matthias Rath, M.D.

The Background

After the declaration of war - carried out under the codename 'Operation Iraqi Freedom' - we felt that a re-statement of the real purpose of his military campaign would help to make the likelihood of President Bush being able to enact the pharma-protection laws under cover of this strategy a more remote possibility.

Throughout the build-up period, our open letter information campaign had challenged the reasons for this illegal war and called for the prosecution of those responsible, under international law. The public exposure of this information had prevented the covert achievement of the real aims of the war on terror and brought into the open the true nature of the 'business with disease.'

Continuing our policy of always offering solutions to the problems identified, it was also time to look ahead and to call upon those world leaders who had not supported President Bush to take action to address the problems at the root of those events. Our program 'Health for All by the Year 2020' offered a breathtaking perspective on how this might be achieved.

The Reaction

Initial signs that our message had been read and understood soon began to appear. Within a few weeks, the Channel 4 television network in the United Kingdom broadcast a searing indictment of the pharmaceutical industry for causing millions of unnecessary deaths around the world through 'patent profiteering.'

By May of that year, the prestigious British Medical Journal felt it necessary to devote a whole issue to criticizing the methods used by the drug companies in furthering their profits at the expense of health and, in editorials and specially commissioned research articles, generally savaged their business ethics.

The adjacent open letter was reprinted in the *Los Angeles Times* on the very weekend when the 2003 Academy Awards ceremony, the 'Oscars', took place in LA. It was the night, when Michael Moore delivered his acceptance speech and criticized George Bush's war on Iraq in front of an audience of hundreds of millions around the world. We hope that our information in the LA Times on that very day encouraged him to stand up.

The Outcome

As the 'shock and awe' raged on in Iraq, it was becoming increasingly clearer to most people that the invasion would not be the short, surgical operation to remove Saddam and restore democracy that President Bush had promised at the outset. A long drawn-out war of attrition was in prospect and the specter of another Vietnam began to raise its ugly head, even in the United States.

The scale of the unnecessary destruction of human life by the pharmaceutical industry's practice of putting profit before health contrasted sharply with the death toll in Iraq and the significance would not be lost on world leaders, as subsequent events would come to show.

But what about that 'worldwide health threat' codenamed SARS?

THE NEW YORK TIMES, MARCH 16, 2003

PHARMA-CARTEL WAR PLANS CAN NO LONGER BE ACHIEVED!

In recent years the pharmaceutical industry has been exposed as a multi-trillion dollar 'investment business with disease' the future of which is dependent on the continuation and expansion of diseases.

I. THE GOAL OF THE PHARMA-CARTEL:

Cementing the global control of its 'investment business with disease.' The very existence of the pharmaceutical industry is currently threatened. Damage claims from the deadly side-effects of one single drug are bringing down Bayer, the flag ship of this industry. The ensuing 'domino effect' would inevitably cripple this largest investment sector on earth. At the same time, scientific advances in non-patentable natural health offer effective, safe and affordable alternatives to the multi-trillion dollar market of patented drugs.

II. THE MEANS TO ACCOMPLISH THIS GOAL:

- **Establish control of the global interests of the drug industry through corporate protectionist laws and by curtailing civil rights.** This control can only be imposed by drastic legal measures worldwide, such as granting immunity to drug companies, restricting patient rights to liability claims, curtailing freedom of information and eliminating one of the most important civil rights - free access to effective, safe, non-patentable and affordable natural health. All this is currently happening in the USA.
- **Creating the psychological state of fear - on a global scale - to set the stage for these laws - worldwide.** This global fear can only be created during a war that includes the use of weapons of mass destruction such as nuclear, biological or chemical weapons.

III. PRECONDITIONS TO ACHIEVE THIS GOAL:

- **International support.** Such a hazardous strategy can only work if it is backed by international law or organizations such as the United Nations. Lack of this support inevitably causes failure of this strategy because the psychological horror of a nuclear or biological war can no longer be justified or blamed on others. Any war outside international law can no longer be used to justify curtailing civil rights and will turn against those who instigate it.
- **Absolute secrecy.** The most important precondition for this strategy to succeed is secrecy. Under no circumstances must it be revealed in advance.

Since 1). there is no international legitimization for this war and 2). the pharma-cartel's plan is now public, both preconditions failed and their goal can no longer be achieved. Starting a nuclear, biological or chemical war will sacrifice millions of people without the pharma-cartel reaching its goal!

Every family in America, Great Britain and anywhere else in the world should be aware of that and act immediately!

MATTHIAS RATH, M.D.
OPEN LETTER TO GEORGE W. BUSH

This War is neither a vocation nor a 'mission from God' - this is Your War!

Your War is against the interests of six billion people!
Your War is against the declared will of over 180 countries of the United Nations!

Your War is against international law! It is neither morally nor ethically justified!

Your War is against the will of the overwhelming majority of the American people, many of whom approve only because you sent their sons and daughters to the battlefield. No one believes the polls!

Your War is against the interests of every American because it will be fought with weapons of mass destruction. In an attack war involving nuclear or biological weapons - that does not have the support of the world community - you as the instigator carry all responsibility. No matter what weapons of mass destruction explode, no matter where and on which side - the American people, the entire world will point at you.

But the World also knows the true motifs for Your War: **This War is in the interests of the pharmaceutical and oil industry!**

Your War serves the interests of the investment group behind both these industries, namely the Rockefeller-financed Trilateral Commission* who paved the way for your political career. Your War is Their War !

* New York Times, September 13, 1998
'Is There a Role for Another Bush?'

George Bush and Tony Blair are the heads of the two leading export nations of pharmaceutical products. Two out of three drugs sold anywhere in the world come from these two countries. The pharmaceutical / petrochemical industry was a main contributor to their election campaigns.

LESSONS FROM HISTORY

One day, those politicians and executives supporting this war - against any mandate by international law - may be held accountable by courts, including the World Court for War Crimes in The Hague that was inaugurated on March 11 this year.

Now, no one can say 'I did not know' or 'I just followed orders'.

More Information: www.dr-rath-health-foundation.org

The Background

On the verge of what would later come to be known as 'Operation Iraqi Freedom' and with the use of weapons of mass destruction in such a war clearly still a strong possibility, an urgent re-statement of the real strategy behind the war on terror became necessary.

By continuing to bring to the public's attention those factors governing the developing war situation that lay hidden behind the President's covert strategy, the likelihood of sudden and catastrophic measures being taken (upon which the supporting laws guaranteeing the survival of the pharma-Cartel depended) could be lessened.

President Bush's apparently increasing desperation could still lead him to take catastrophic decisions that would plunge the world into war for a third time. It was imperative that the real goals behind his strategies be continually exposed.

The Reaction

The importance of this open letter can not be overestimated. Until that point it was the plan of the cartel to escalate the Iraq War into a regional inferno with weapons of mass destruction. After we exposed this hidden agenda in broad daylight the New York Times, these plans could no longer be carried out. The threat in this open letter that one day those responsible for these war crimes would be brought to justice – politicians, generals and administrators alike – added to the impact of this message.

The cartel had to switch their tactics. During this critical period, the mysterious SARS threat once again came to the fore, increasing the tensions already felt around the world as the US-led coalition continued its hard line war on terror agenda.

Suddenly and unexpectedly, the World Health Organization declared that the SARS outbreak had become a 'worldwide health threat' adding further pressure to the psychological state of emergency created by the activities of President Bush's war coalition.

It could not be coincidence (again) that the link between health and peace and disease and war would be so clearly illustrated in world events. Just as our exposure of the fraudulent pharmaceutical 'business with disease' and the true intentions of the President's war on terror gathered momentum, a 'worldwide health threat' was announced creating fear of an epidemic that would engulf the world - perfect conditions under which to pursue a hidden agenda.

The Outcome

With the world's attention temporarily diverted by the SARS 'epidemic,' President Bush decided to go ahead with his war plans. In flagrant disregard of all international laws and human rights - and with the full support of British Prime Minister Tony Blair - the President decided to go to war.

Following our exposure, he dare not risk the use of weapons of mass destruction for fear of reprisal, but would nevertheless undertake a campaign of 'shock and awe' that would divide world opinion for the foreseeable future.

At 10:16 pm Eastern Standard Time on March 19, 2003, President Bush addressed the American people in a live TV broadcast from the Oval Office of the White House: "My fellow citizens, at this hour, American and coalition forces are in the early stages of military operations to disarm Iraq, to free its people and to defend the world against grave danger."

We Are No Longer Willing To Sacrifice Health and Peace!

Open Letter by Matthias Rath, M.D. to the American People and to the People of the World!

Dr. Matthias Rath is the physician and scientist who led the breakthrough in the natural treatment of cardiovascular disease and cancer. He is a member of the New York Academy of Sciences and other renowned scientific organizations. 10 years ago, the late Dr. Linus Pauling, recipient of the Nobel Prize in Chemistry and Peace stated: "Your discoveries are so important for millions of people that they threaten entire industries. One day there may even be wars just to prevent this breakthrough from being widely accepted. This is the time, when you need to stand up!" - This time is now!

Only 24 hours after my previous Open Letter was published in the *New York Times* on February 28, the 'master mind' behind 'September 11' was presented to a stunned global audience. After entire armies had searched for him for one and a half years, he was found while asleep in an apartment in Pakistan. - Is this a coincidence?

"As the physician and scientist who was privileged to contribute discoveries that make the eradication of cardiovascular disease by natural means possible and save millions of lives I raised my concerns in an Open Letter published in the *New York Times* on February 28. I raise my voice once again on behalf of millions of people who are deprived of life saving natural health information, which threatens the multi-trillion dollar pharmaceutical investment business of patented drugs.

PEACE NOT WAR

My Open Letter published in the *New York Times* one week ago revealed for the first time:

- **The largest corporate benefactor** of the September 11 tragedy was the multi-trillion dollar pharmaceutical industry. In August 2001 Bayer's Baycol scandal was the beginning of a 'domino effect' threatening the survival of this entire investment industry. Similarly to the tobacco industry, individuals and governments were beginning to sue drug companies for billions in damages. After September 11, all media attention shifted away.
- **The close connection** between the pharmaceutical/petrochemical industry as the single largest donors for the election campaigns of George Bush and his all out efforts to protect and promote the interests of this investment industry.
- **The main agenda** behind the war escalation is to regain control by the pharmaceutical industry and establish its long-term global monopoly for the "investment business with disease". This can only be achieved by eliminating civil rights - including freedom of information and free access to natural health. Wars - especially the use of weapons of mass destruction - can accomplish all that.

HEALTH NOT DISEASE

Unbeknown to most people, the very same industry has been leading another war for decades. According to the *Journal of the American Medical Association* (April 15, 1998) in this 'war' every year more than 100,000 people die and more than 1,500,000 are hospitalized from the side effects of harmful prescription drugs.

In this 'war at home' people are harmed in several ways. They are promised 'health' but they receive drugs that do not cure, only cover symptoms. Moreover, millions of patients and entire economies are financially ruined for the sake of the huge profit margins of this investment industry. All of this is no surprise, because the continued existence of diseases and their expansion is a precondition for further growth of the drug industry. Prevention and eradication of diseases undermines the investment nature of this business.

With its current 400 billion dollar 'Medicare' plan, the Bush Administration is making further concessions to the pharmaceutical 'investment business with disease' at the expense of millions of patients.

The cornerstones of a new patient-oriented, effective and affordable health care are available:

Effective, Safe and Affordable Health Care for the American People and the People of the World

1 Prevention and Eradication of Diseases Instead of Treatment of Symptoms.

Eighty percent of pharmaceutical drugs currently prescribed to patients have no proven efficacy - at the very best, they alleviate symptoms without addressing the root cause of the disease. Future health care systems will focus on prevention, treatment of root causes and eventually the eradication of diseases.

2 Healthy Body Cells Are a Precondition of Good Health.

Health and disease in the human body are determined at the level of cells. The main cause of cellular dysfunction is the insufficient intake of micronutrients essential for optimum cellular metabolism and their optimum daily intake is a precondition for health. This new understanding of Cellular Health can be summarized in three principles:

3 Cellular Health Principle #1: Optimum Supply of Cell Energy.

Essential nutrients are required for maintaining cellular energy metabolism. An optimum supply of these nutrients is a prerequisite for the prevention of irregular heartbeat (energy deficiency in myocardial cells responsible for regular heartbeat), heart failure (energy deficiency in myocardial cells responsible for contraction of the heart muscle and blood pumping), and similar conditions.

4 Cellular Health Principle #2 - Optimum Connective Tissue Stability of Soft Tissues.

Approximately one half of the body's proteins are composed of collagen, elastin, and other connective tissue molecules. Their production is regulated by vitamin C, and the amino acids lysine and proline, which are the main building blocks of these proteins. The human body does not produce vitamin C or lysine and, therefore, is dependent on an

optimum lifelong supply of these nutrients. The application of this basic knowledge will decrease the incidence of today's most common health problems such as heart attack, stroke, cancer and many other diseases to a fraction of their current rates.

5 Cellular Health Principle #3 - Optimum Connective Tissue Stability of Bone Tissue.

The stability of the skeletal system and our teeth is determined by the optimum production of collagen molecules (facilitated by vitamin C, lysine, and proline) and the proper introduction of essential minerals (such as calcium and magnesium) and trace elements. The systematic implementation of this knowledge will largely prevent widespread diseases such as osteoporosis (bones), caries (teeth), and periodontitis (gums).

6 Independent Health Information and Education Is the Key to Health.

Although we are at the beginning of the third millennium, it is still a little-known fact that the human body does not produce vitamin C or lysine, two key nutrients in determining human health and disease. This is the result of the pharmaceutical industry's ongoing efforts to suppress this information. The dissemination of basic health information and the implementation of health education from childhood to advanced age is the foundation of the new health care system.

7 Comprehensive Research in Natural Health Is a Cornerstone of a New Health Care System.

Currently, medical research is being driven by the share prices of drug companies, not the health needs of people. The implementation of natural health and Cellular Health principles saves billions in health care costs. These billions in savings should be reinvested into further research in natural health. It is a fact that many more diseases are connected to cel-

lular deficiencies in essential nutrients. The introduction of comprehensive natural health research programs as part of public health policies would greatly accelerate the elimination of diseases.

8 Implementation of the Scientific Principles of Cellular Health.

Each year, millions of people world wide die from diseases that can be prevented and controlled by natural means. The implementation of the scientific principles of Cellular Health into healthcare policies will save millions of lives and billions of dollars in public and private funds. These dollars could then be used to also address other basic needs of society.

9 Elect Politicians Who Defend the People's Right to Natural Health.

Politicians who continue to support legislation that restricts the dissemination of natural health information endanger the health and lives of the people who elected them. Politicians who continue to obstruct natural health rather than support it will be held accountable. All governments have a responsibility to protect the lives of their citizens and promote effective, safe and cost saving health measures in their countries.

10 Ban the Pharmaceutical Industry's 'Business With Disease,' Not the Dissemination of Natural Health Information.

To protect their billion-dollar market with largely ineffective drugs, pharmaceutical companies are trying to fight off their fiercest competition: effective, safe, and affordable essential nutrients. To that effect, the pharmaceutical lobby has been abusing the United Nation's "Codex Alimentarius" (Food Standard) Commission and many other national and international political bodies. Maintaining and expanding diseases, as the basis for the growth of the investment 'business with disease,' will be prohibited by law.

LESSONS FROM HISTORY

Mankind is currently going through one of the greatest advances in its history. Two out of three of today's diseases can largely be eradicated if the scientific knowledge currently available in the area of natural non-patentable health is implemented in any health care system.

Over 400 years ago, a similar quantum leap took place in history. During medieval times 80% of the people living in Europe were illiterate. The invention of the printing press together with the translation of the bible into spoken languages allowed millions of common people to learn to read and write.

Knowledge was power and the rulers at that time did not want to share their power with the people. They wanted to preserve their feudal economic privileges and met the 'liberation from illiteracy' with utmost brutality. In the '30-Year War' (1618-1648) they destroyed half of Europe and killed millions of people in an attempt to bring back Medieval Times. All was in vain because the people no longer wanted to live in illiteracy and dependency.

Today we are facing a 'liberation' of similar magnitude - but global in its scope. The possibility to liberate mankind from cardiovascular disease, cancer and many other diseases by natural, non-patentable means threatens the very existence of the multi-trillion dollar pharmaceutical investment industry.

As we are all witnessing, today's 'economic rulers' are not willing to give up their economic privileges voluntarily. Just as they did 400 years ago they are willing to sacrifice the lives of thousands, even millions of people in their own decline.

There is one difference worth noting. Centuries ago, wars were fought with pitchforks and muskets. Today they are fought with weapons of mass destruction including nuclear weapons.

Millions of people living today in America and in every other country of the world have to make a decision: Do we really want this to happen? If not, the time to act is now!

With the multi-trillion dollar pharmaceutical investment industry as the largest corporate benefactor behind the current 'war on terrorism' revealed and in broad daylight for the world to see, what are the options left for this interest group? When the first nuclear or biological weapons detonate - who will be blamed? Who will accept the arguments that civil liberties need to be abandoned and press freedom abolished?

This interest group and its political stake holders have to realize: Whatever they do now - including any military action - their goal is now publicly exposed and can no longer be achieved.

All of us, the people of America, the people of the world now have the great opportunity and responsibility to help build a healthier and more peaceful world. Now its up to us!

"The Time to Protect Our Health and Our Lives Is Now!"

Matthias Rath, M.D.

More Information: www.dr-rath-health-foundation.org

The Background

After failing to gain the approval of the United Nations Security Council for an invasion of Iraq, the United States was becoming increasingly isolated from most of the other members of the United Nations – with the dishonorable exceptions of the United Kingdom and the other members of the US-led coalition.

This isolation was portrayed to the American people by President Bush in his familiar 'my way or the highway' style as being the product of a failure by the United Nations to accept its responsibility. With his moral conviction of having both right and God on his side, the siege mentality already prevalent in the United States following the President's declaration of a 'War On Terror' became increasingly oppressive.

The United Nations' failure to act in this crisis further bolstered the psychological pressure on the American people and President Bush played up to this relentlessly.

He could once again think about going to war against Iraq as the perfect cover behind which one of the greatest crimes ever committed would be perpetrated.

The lessons of history, once again, provided clues to the covert nature of these plans and the suppression of knowledge that maintained the power of the financial elite.

The Reaction

Exposure of the death and injury toll of the war at home between health and disease - in contrast to the toll from the war on terror - would prove to have far reaching effects, the results of which would soon become apparent in the media.

In its March 2003 edition, the German magazine Der Spiegel, one of the world's leading news magazines, openly criticized the pharmaceutical industry for its accumulation of profits at the expense of health – without any fear of reprisal or legal challenge. The placement in the public domain of key information relating to the operation of the pharmaceutical 'business with disease' guaranteed this.

The pharmaceutical industry was being unmasked as a business built upon and profiting hugely from the perpetration of a giant fraud – the promise of health but the delivery of disease.

The Outcome

President Bush was so intent upon invading Iraq that he was seemingly willing to risk the use of weapons of mass destruction in order to further his aims. The exposure of the hidden agenda behind this intent rendered the use of WMD's less likely – the President would not survive the fallout as everyone would know the reality. Whilst the threat of an invasion of Iraq had not receded, mass destruction was no longer the almost certain outcome it had seemed.

Exposure of the profit before health interests of the pharmaceutical industry would make it increasingly difficult for President Bush to push through the protectionist laws the pharmaceutical industry needed in order to survive the inevitable onslaught that would surely engulf it once people realized the extent of the fraud to which they had been subjected.

With the laying of the cornerstones of a new healthcare system – public health information for all to see and use – a new and exciting front had been opened up in the war between health and disease. New possibilities for public healthcare programs to achieve real health gains through the eradication of diseases became possible from this moment onward – not only in the United States of America, but worldwide. The substantial benefits to developing countries of this approach would not be overlooked.

Scare pictures like these are another important element in the propaganda war of the Bush Administration: a so-called portable "mini-nuke."

Mr. Bush - This War Is Not a Sign of Strength, But of Desperation!

**Open Letter by Matthias Rath, M.D.
to US-President George Bush
and to the People of the World!**

“As the physician and scientist who was privileged to contribute discoveries that make the eradication of cardiovascular disease by natural means possible and save millions of lives, I am asking you: could it be that this war is not about fighting 'terrorism' or conquering oil fields but about protecting the largest investment industry - the pharmaceutical industry - from collapse?”

Millions of people worldwide are waking up to the fact that the pharmaceutical industry is an investment industry based on the continuation of diseases.

The survival of the pharmaceutical investment industry is threatened by four main factors:

1 Unsolvable business conflict. The nature of the pharmaceutical investment industry is the 'business with disease'. Its basis is the patentability of new synthetic drugs that merely target symptoms but do not eliminate the root cause of diseases. The continued existence of diseases and their expansion is a precondition for further growth of this industry. Prevention and eradication of diseases undermines the economic basis of this business.

2 Unsolvable legal conflicts. A wave of patient litigation against the deadly side effects of pharmaceutical drugs threatens to cripple this industry. An end to this litigation is not in sight, since drug side effects are the fourth leading cause of death in the industrialized world (*Journal of the American Medical Association*, April 15, 1998). Side effects of pharmaceutical drugs kill more Americans every year than WWII and the Vietnam War combined.

3 Unsolvable ethical conflicts. The pharmaceutical industry faces an intrinsic conflict between maintaining profits from patent fees and meeting the health needs of people. In the developing countries, the profitability of drugs has been a major factor contributing to the spread of AIDS and other epidemics.

4 Unsolvable scientific conflicts. Advances in vitamin research, cellular medicine and natural health allow the control of today's most common diseases. These safe, effective and affordable natural therapies focus on the prevention and eradication of diseases - not only the alleviation of symptoms. This fact and the low profitability of these non-patentable natural approaches, threaten the economic base of the pharmaceutical investment business.

While many events led up to the current crisis, none was as threatening to the survival of the entire pharmaceutical industry as the scandal around Bayer's cholesterol lowering drug Baycol.

In August 2001 Bayer had to withdraw its leading new drug Baycol because more than 50 people had already died from taking it and more than 6 million patients were at risk from the deadly side effects of rhabdomyolysis (dissolving of muscle tissue). British phar-

September 11, 2001

2,600 innocent people died in this tragedy. The same number of people die from side effects of prescription drugs every ten days (Source: JAMA, April 15, 1998).

pharmaceutical multinational Smith Kline Beecham (SKB) was Bayer's global marketing partner.

Bayer - a century old flagship of the pharmaceutical industry - and British SKB - the world's second largest drug maker - were faced with crippling lawsuits and other devastating economic consequences:

- Over 7,000 Patients taking Baycol from around the world have filed individual and class action lawsuits against these drug companies.
- Government authorities filed criminal lawsuits against the executives of these pharmaceutical companies for gross negligence. These executives knew about the deadly side effects while continuing to press for higher dosages.
- Investors lost billions of dollars in share value, threatening the very survival of these companies.

The Baycol scandal was only the beginning of a 'domino effect'. Within weeks many multinational drug companies were faced with lawsuits from patients suffering severe side effects from taking other pharmaceutical drugs (beta blockers, calcium antagonists, estrogen replacement, etc).

In summary, the pharmaceutical industry was facing the same grim fate as the tobacco industry, with entire States and Nations suing these companies for billions in damages. In August 2001, the end of the pharmaceutical industry seemed closer than ever.

But then everything stopped on September 11, 2001. On this day global attention shifted away from the crisis facing this industry.

Since then, the main goal of the Bush administrations has become to secure the survival of the pharmaceutical industry through:

- Attempts to overcome the unsolvable scientific conflicts. The Bush administration is spearheading an international effort by the pharmaceutical industry to outlaw natural health therapies world-wide by abusing the United Nations 'Codex Alimentarius' (food standards) commission.
- Attempts to overcome the unsolvable ethical conflicts. The recent 'relief' program for fighting AIDS in developing countries is a 15 billion Dollar subsidy program for drug makers. While neglecting effective natural therapies to fight immune deficiencies this plan maintains the economic dependency on drug companies.
- Attempts to overcome the unsolvable legal conflicts. A key provision of the 'Homeland Security Act' grants immunity to the pharmaceutical companies for present and future product liability claims for vaccines. Further plans for 'medical litigation reform' include limiting product liability lawsuits against drug companies.
- Attempts to overcome the unsolvable business conflict. This conflict cannot be solved because it would destroy the very nature of the pharmaceutical "business with disease". The only option for this industry's survival are protectionist laws that artificially maintain control of the pharmaceutical investment business and its global health monopoly.

The war against Iraq is not primarily about fighting 'terrorism' or conquering oil fields. It is part of a long-term strategy of the pharmaceutical/petrochemical investment groups to create the psychological state of fear to maintain global control.

Long term international conflicts, wars - even the use of weapons of mass destruction - can be used to achieve this goal and suppress any opposition.

This war is not a sign of strength - but of desperation.

Dr. Matthias Rath is the physician and scientist who led the breakthrough in the natural control of cardiovascular disease and cancer. He is member of the New York Academy of Sciences and other renowned scientific organizations. 10 years ago, the late Dr. Linus Pauling, recipient of the Nobel Prize in Chemistry and Peace stated: "Your discoveries are so important for millions of people that they threaten entire industries. One day there may even be wars just to prevent this breakthrough from being widely accepted. This is the time, when you need to stand up!" - This time is now.

LESSONS FROM HISTORY

70 years ago, this week, an event shocked the world and set the stage for the last World War. On February 28, 1933 the German parliament building, the Reichstag, was set on fire.

The official version that 'terrorists' had led the attack was soon questioned abroad. Today it is a fact that the Reichstagsbrand was deliberately used as a pretense and that the 'empowerment laws' following this event had been prepared in advance.

Following the burning of the Reichstag:

- civil rights were abolished,
- empowerment laws were enacted, including a "Homeland Security Act" ("Schutz von Heim und Reich").

The Reichstag-Assault in 1933 provided the legal platform for 12 years of dictatorship and WWII. Its main benefactor was IG-Farben, the largest European petro-chemical Cartel seeking control of the oil and chemical industry worldwide.

February 28, 1933

- 70 Years Ago -

The German Parliament building, the Reichstag, was set on fire. This event delivered the pretense for the transformation of a democracy into a dictatorship on behalf of the largest European corporate Cartel.

In the Nuremberg War Tribunal in 1946/47 this Cartel was tried for 'conquest', 'robbery' and 'slavery' and - as a result - it was dismantled into Bayer, BASF and Hoechst.

This War Tribunal established that without these corporations, World War II would not have been possible. US-Chief Prosecutor Telford Taylor stated: "If their guilt is not brought to the daylight, they will do even more harm in future generations."

Then and now millions of decent people are in danger of being misled by their own governments. And those who do not learn the lessons from history are doomed to live through it again!"

“Mr. Bush, in the name of mankind: Stop This War!”

Matthias Rath, M.D.

The Background

"Those who cannot remember the past are condemned to repeat it."
George Santayana, The Life of Reason, Volume 1, 1905

At the beginning of the twenty-first century the words of the famous US philosopher had never been as true as they were now. By the end of February 2003, President Bush's war agenda was following a route taken once before by another Administration that had had the backing of pharmaceutical interests. The parallels were simply astonishing.

Haunting images of the burning World Trade Centre buildings in New York flashed around the world echoing those of the burning Reichstag buildings in Berlin, Germany 70 years earlier – and once again, so called 'acts of terrorism' were being used to divert the public's attention away from clandestine attempts to further the interests of those controlling the worldwide pharmaceutical industry.

In the early twentieth century, those interests were concerned with expansion and the creation of a cartel, whereas now, the survival of an established multi-billion dollar industry was at stake. Only by the resolution of apparently unsolvable business, legal, ethical and scientific conflicts inherent in the industry through the passing of protectionist laws could the future be assured. The government's rapid assumption of emergency powers that followed both the current and the historic events was a pre-condition for the achievement of those goals.

The Reaction

Within twenty four hours of the publication of our open letter – and after whole armies had spent one and a half years looking for him – suddenly and unexpectedly Central Intelligence Agency officers and the Pakistani authorities announced the capture of Khalid Shaikh Mohammed, suspected to be the mastermind behind the 9/11 attacks. Was this coincidence?

Towards the end of the two week period between the publication of our first and second open letters, another astonishing event took place. The World Health Organization declared the existence of a previously unknown worldwide health threat that would come to be known as SARS - Severe Acute Respiratory Syndrome.

For weeks on end following this dramatic announcement, the

media would be rife with speculation about how the death toll from SARS could run into millions and about the efforts to quarantine whole countries by the introduction of travel restrictions. Once again, the public were placed on a state of alert, thus maintaining the psychological conditions for the exercise of those all important emergency powers. Was this another coincidence?

The Outcome

With its main covert strategy laid bare for all to see, the Bush Administration was forced to turn instead to plan 'B' and to continue to escalate the situation even further. If the protection of the financial interests behind the pharmaceutical industry was to be achieved, the state of fear created by SARS offered the perfect cover behind which President Bush could carry on his covert agenda.

Having already declared in his State of the Union speech in January 2003 that he was ready to attack Iraq without a United Nations mandate (White House Press Office, January 28, 2003) President Bush increased his demands for such a strike and the United States began lobbying other Security Council members to support this action.

The focus of the war on terror was firmly shifting toward Iraq.

Make Health - Not War!

Open Letter by Matthias Rath M.D.

**to US-President George Bush
to the Leaders of the World
to the American People
and the People of the World**

"On the eve of a possible world war, I am calling upon you to stop any military action! Make Health-Not War! This war is not in the interest of the people of the world but of special interest groups that include - beside the oil industry - also the pharmaceutical industry. Or was it a coincidence that the pharmaceutical industry - not the oil industry - was the main sponsor of the 'war agenda' during the last US-elections in November 2002?"

At the beginning of the 21st century mankind stands at the cross roads. Advances in the field of natural health will save millions of lives but threaten the very existence of the multi-trillion dollar pharmaceutical investment industry, that is based on patents and the continuation of diseases. This entire industry is in a battle for survival. A prolonged international crisis and the curtailing of civil rights play right into their hands.

The people of America, the people of the world need a strategic plan to combat these special interests, to stop funding them and to ensure long-term peace and health for this planet. This plan was presented at the World Summit in Johannesburg in August 2002 and is now being implemented in more and more countries.

Dr. Matthias Rath is the physician and scientist who led the breakthrough in the natural control of cardiovascular disease and cancer. He is member of the New York Academy of Sciences and other renowned scientific organisations. Already 10 years ago, the late Dr. Linus Pauling, recipient of the Nobel Prize in Chemistry and Peace stated: "Your discoveries are so important for millions of people that they threaten entire industries. One day there may even be wars just to prevent this breakthrough from being widely accepted. This is the time, when you need to stand up!" - This time is now.-

Natural Health for All by the Year 2020 is Possible!

1 Health is a basic human right. Every person is entitled to make use of this right without any restriction. Public institutions and private organizations are to be held accountable for providing life-saving health information to the people of the world. The obstruction of the right to essential health information for everyone constitutes a crime against humanity.

2 Today, health is not available to every human being for good reasons. These include social injustice, military conflicts and others. Another significant reason is the fact that **the most profitable industry on earth, the pharmaceutical industry, is an investment industry based upon the existence and continuation of diseases** - despite declarations to the contrary. Low-cost prevention, treatment and elimination of diseases threaten this multi-trillion dollar pharmaceutical "business with disease".

3 Most efforts to improve health on a global scale have failed thus far. The World Health Organization's effort "Health for All by the Year 2000" could not reach its goals because it did not distinctly separate itself from the global "business with disease." It focused instead on administrative healthcare changes, rather than taking advantage of global advances in medicine.

4 Advances in the field of natural medicine have been made over recent

years that will reduce the incidence of common diseases in the industrialized countries as well as in the developing world, to a fraction of their current frequency. **The primary cause of the world's most common health conditions is a chronic deficiency of micronutrients**, essential for optimum cellular energy metabolism as well as optimum connective tissue stability.

5 In the industrialized world, the leading causes of death are heart attacks, cancer, strokes, diabetes and high blood pressure. Using the available knowledge in nutritional research and cellular medicine, these health conditions can be significantly reduced and **hundreds of millions of lives can be saved.**

6 In the developing world, two billion people suffer from deficiencies in micronutrients, according to United Nations Organizations. Avitaminosis is a leading cause of disease resulting in blindness in millions and promoting infectious diseases -including AIDS- in hundreds of millions by compromising cellular defense mechanisms in their bodies. Taking advantage of the knowledge of nutritional medicine already available today, **billions of lives can be saved in the developing world.**

7 The eradication of today's most common health problems is dependent on one factor only: how fast the information

about this breakthrough in natural health can be spread. Whilst the scientific knowledge to combat these diseases effectively is available and the essential nutrients to prevent these health conditions can be produced at low costs, in any quantity, anywhere in the world, the dissemination of this life-saving information to the people of the world is being obstructed.

8 The pharmaceutical industry tries to protect its global drug market by outlawing natural remedies. Effective, non-patentable and affordable natural health approaches threaten the very existence of the pharmaceutical industry. **The multi-trillion dollar global pharmaceutical market is dependent on synthetic drugs that allow an excessively high return on investment based on the patentability of those drugs.** To secure the continued existence of the pharmaceutical industry as the most profitable industry on earth, large corporations embarked on a **global battle to outlaw the dissemination of natural health information.** To that effect the pharmaceutical industry abuses the United Nations "Codex Alimentarius Commission" and other national and international bodies.

9 The people of the world face one of the largest challenges in human history. The right to health and life for billions of people is being threatened by the profit interests of a few shareholders. **The goals of**

these two interest groups are incompatible by their very nature. Similarly, in the battle to save human lives against the profits from patented drugs, every government, every public and private institution has to take a decision on which side they stand. And they will be held accountable by history.

10 The goal "Health for All by the Year 2020" is in sight. What is needed immediately is a worldwide effort to promote the dissemination of natural health benefits in every country.

I call upon

- The United Nations Organizations and other international organizations to promote natural health policies by all means available;
- Politicians in every country to implement natural health as an integral part of national health policies;
- Health professionals to utilize natural health approaches to improve the health of your patients.

I call upon every man and woman to spread this life-saving information in order to protect your life and that of millions of others.

Matthias Rath, M.D

World Summit,
Johannesburg 2002

Many Countries Are Implementing This Breakthrough:

The World Summit was attended by over one hundred Heads of State. Many countries acted on this plan and adopted natural health policies to improve the health of their people. Prominent examples are:

- **Jordan.** All school children and students will receive free vitamin supplementation composed of Vitamin C, B-Vitamins, Vitamin D, Folic Acid and Iron.
- **United Arab Emirates.** A 1.8 billion dollar Natural Health City will be established in

Dubai to study and promote alternative health programs for the people in the Arab Emirates.

- **South Africa.** The South African government recognized the critical role of micronutrients for strengthening the immune system in combating infectious diseases like tuberculosis and AIDS. Bread will be vitamin enriched nationwide to protect the poorest part of the population from malnutrition.

- **Other African Countries.** The sub-Saharan

countries Lesotho, Malawi, Mozambique, Swaziland, Zambia and Zimbabwe and Angola are establishing similar community-based nutrition programs nationwide.

- **UN-Food and Agricultural Organization (FAO)** launched an international campaign in November 2002 "Food is the first medicine for HIV/AIDS".

In implementing these programs, these coun-

tries use scientific information already available in the fight against cardiovascular disease, cancer and infectious diseases - including AIDS. E.g., studies published in the Proceedings of the US National Academy of Sciences prove that vitamin C alone is able to inhibit HIV virus activity by more than 99% (!).

Further information and copies of the studies can be found and downloaded from the website below.

Why the Pharmaceutical Industry Is Backing a War Agenda:

Every country that adopts a national policy based on effective natural therapies is a nail in the coffin of the pharmaceutical 'business with disease'. In the global battle between natural health and the financial interests of the drug companies there can be only one winner.

That is why the pharmaceutical interest groups have placed their lobbyists in key political positions:

- George Bush and Tony Blair are the heads of the two leading export nations of pharmaceutical products. They are also the most aggressive war advocates.

- Donald Rumsfeld has been the CEO and Board member of several pharmaceutical multinationals (Searle, Gilead etc.). Now he is the fiercest war advocate in the Bush administration and controls where and how long the bombs fall.

The following facts now also appear in a new light:

- The pharmaceutical industry was the single largest industry group sponsoring the war agenda of the Bush administration during the November 2002 elections.

- The first 'benefactors' from the 'Homeland Security Act' where the drug companies, receiving guaranteed immunity for any side effects of their products!

- In his State of the Union Address, President Bush does not support effective natural health, but promises a 400 billion dollar (!) subsidy program for the drug companies under the cover of Medicare.

- And even the surprising 15 billion dollar support for AIDS treatment in Africa will primarily benefit the drug companies - not

the people of Africa. Despite effective and affordable alternatives they are kept in dependency of the pharmaceutical Cartel."

" Make Health - Not War! " Matthias Rath, M.D.

The Background

Following mid-term elections in November 2002, the Republican Party regained majority control of the Senate and expanded their majority in the House of Representatives, effectively gaining control of Congress. This event strengthened an already strongly held view that President Bush would use his dominance in Congress to try to force through an increasingly extreme agenda.

That agenda had been shaped by the terrible events of 9/11, events that President Bush was increasingly using as an excuse to further more and more outrageous actions in blatant disregard of national and international laws. The inauguration of a Homeland Security department resulted in a wave of 'emergency' legislation that helped create the impression of imminent threat to cities across America, making the passing of laws severely restricting personal freedoms possible. But did the President's ultimatum "You're either with us or against us in the fight against terror" actually signal another reason for the headlong rush to war?

The fact that 9/11 diverted attention from the Baycol scandal that had erupted in August 2001, saving the giant pharmaceutical firm Bayer from being wiped out in the process, showed that the climate of fear created by such incidents could be used to good effect by the pharma-Cartel in order to further their financial interests. Subjecting the nation to a state of war in order to mask the creation of conditions favorable to the future profitability of the pharmaceutical industry, eventually led to the introduction of a \$400 billion subsidy for the drug makers under cover of Medicare.

The Reaction

Perhaps inspired by our exposure of the pharma-Cartel's backing for the Bush war agenda, New York Attorney General Eliot Spitzer charged the world's two largest pharmaceutical companies, Pfizer (through its subsidiary Pharmacia) and GlaxoSmithKline, with using illegal schemes to inflate the price of drugs, costing consumers and government health plans hundreds of millions of dollars.

Acting on behalf of the state of New York, Spitzer charged these two companies with consumer fraud, commercial bribery and making false statements to government health plans about drugs, including those for cancer treatment. This would subsequently prove to be the first of several such actions against the pharmaceutical companies.

But that was only half the story. In offering positive solutions to the

problems that we had exposed to the light of public scrutiny, not only would the negative effects be countered, but our information could also help to encourage the establishment of positive reactions.

Within a few weeks of publication in this open letter of the ten key elements that would make 'Health for All by 2020' achievable, public health policies based upon natural approaches instead of dangerous pharmaceutical drugs were announced in: Sri Lanka, Wales and South Africa and three leading US nutrition agencies - the American Dietetic Association, Society for Nutrition Education and American School Food Service Association - called for nutrition initiatives to be an integral part of school health programs.

The Outcome

The detailed public exposure of the real agenda behind the 'War on Terror' had the effect of delaying what had previously appeared to many to be an unstoppable rush toward a Third World War that would inevitably involve the use of weapons of mass destruction. Through openly publishing the hidden truths, the clandestine strategy was foiled.

On the positive side, a clear statement of the scientific facts supporting the efficacy of natural remedies, something rarely seen in the public media, for the first time created an environment in which enlightened governmental agencies and national non-governmental bodies could boldly begin to incorporate this knowledge into their public health programs.

After February 2, 2003 many people began to view world events in a different light.
