

Freedom Day 50 Years after the Freedom Charter:

There Is No Health Freedom As Long as It Is Enslaved

By the Drug Cartel!

The pharmaceutical industry is conducting the largest fraud operation in the history of mankind: it deceptively promises health, yet its entire existence is dependent on the continuation and expansion of diseases.

The multi-billion dollar profits of this fraud operation depend on the sale of expensive synthetic patented drugs with enormous patent fees being the basis for the investors' profits.

The pharmaceutical industry is the worst form of corporate colonialism ever. It has become one of the largest and most profitable investment industries in the world by sacrificing lives in genocidal proportions and ruining the economies of almost 200 countries. Two countries, the US and the UK alone produce two thirds of the world's pharmaceutical drugs.

The biggest challenges to the survival of the pharmaceutical industry are natural therapies, which threaten the very existence of this investment business with disease. Natural therapies are not patentable and therefore less profitable, but above all,

they effectively prevent and eradicate diseases.

THE DRUG CARTEL'S BUSINESS WITH THE HIV/AIDS EPIDEMIC

The AIDS epidemic is one of the greatest health challenges in the history of mankind and it has reached genocidal proportions. From the very onset, the pharmaceutical invest-

in the body including the white blood cells, responsible for immune defense. By taking these drugs, patients suffering from AIDS and other immune deficiencies further weaken their immune system and worsen immune deficiencies.

Despite these indisputable scientific facts, the pharmaceutical cartel is pouring billions into the developing world, especially South Africa, in order to maintain its drug monopoly of the HIV/AIDS drug market and to suppress natural non-patentable health alternatives.

To highlight the dimension of this fraud to the people of South Africa: The British pharmaceutical multinational, Glaxo SmithKline, the manufacturer of the ARV drug AZT, has taken more money from this drug fraud scheme than the economies of the 40 poorest countries in Africa combined!

Now is the time for the people of South Africa to liberate themselves from the strangling yoke of pharmaceutical colonialism forever. Amandla!

Matthias Rath, M.D.

Dr. Rath is the world-renowned scientist and physician who led the breakthrough in the natural control of many of today's most common diseases.

With this public health information Dr. Rath wants to assist the people and the government of South Africa to decrease the dependency from the pharmaceutical investment 'business with diseases.'

The Dr. Rath Health Foundation Africa is a non-profit organization dedicated to research and education in the area of science-based natural health. Its primary focus is to improve the health of millions of people through community-based health education programmes.

Dr. Rath is supported by a growing team of outstanding scientists and doctors committed to fostering the scientific evidence and awareness that the HIV/AIDS epidemic can be controlled naturally.

Break the Chains

Of Pharmaceutical Colonialism

ment business has used this disease as a giant marketplace for its patented drugs, namely anti-retroviral drugs (ARVs).

These drugs damage the genetic material in millions of cells

Medical Proof: Micron

APPEAL TO THE PEOPLE OF SOUTH AFRICA:

While millions of people in South Africa celebrate Freedom Day and the 50th anniversary of the signing of the Freedom Charter, many are left behind, above all hundreds of thousands of victims of the HIV and AIDS epidemic. Millions of people have already died and tens of millions of people are hoping for and expecting solutions that would spare them a similar fate.

People and governments around the world are looking to scientists to come up with the answers to decrease the suffering and economic burden imposed by the immune deficiency epidemic AIDS.

THE BASIC SCIENTIFIC FACTS CAN NO LONGER BE IGNORED

But the solution is at hand. For nearly a century, **textbooks of biology, biochemistry** and other natural science disciplines have documented the following facts about immune deficiencies:

- the most important remedy to improve the immune system of our body is to increase the production of **white blood cells, such as lymphocytes and monocytes,**
- **vitamins, particularly vitamins B6, B12, vitamin C, folic acid and certain other essential nutrients are the most important natural molecules that stimulate the formation of these defense cells in our body,**
- deficiencies of these essential micronutrients in our diet weaken your immune system and cause diseases such as **anemia and immune deficiencies.**

THE PHARMACEUTICAL BUSINESS DEPENDS ON THE CONTINUATION OF THE HIV/AIDS EPIDEMIC

While these facts are **known to all scientists, they are deliberately withheld from doctors and patients worldwide.** The pharmaceutical industry systematically prevents the widespread dissemination of this information to protect investors and promote its patented drugs.

The exporting of patented antiretroviral (ARV) drugs to people affected with the HIV/AIDS epidemic has become a multi-billion dollar business and a tool to renew old colonial dependencies of the developing world. Non-patentable, natural health solutions threaten the very existence of this drug business and are therefore being vigorously attacked.

SCIENTIFIC BREAKTHROUGH IN FIGHTING HIV/AIDS - NATURALLY

The Dr. Rath Health Foundation has been a leader in scientific discovery and the promotion of the health benefits of essential nutrients in the area of cardiovascular disease, cancer and other diseases. Our websites are the leading source of science-based natural health information in the world (www.dr-rath-foundation.org; www.dr-rath-research.org).

My scientific discoveries have contributed to these advances in science-based natural health. In the fight against HIV/AIDS, the finding that the amino acid lysine in combination with certain other micronutrients can block the spread of viruses through the connective tissue of our body paves the way for the control of this disease - by natural means.

THE CLINICAL PROOF: THE HIV/AIDS EPIDEMIC CAN BE CONTROLLED NATURALLY

This new scientific approach has now been confirmed in a clinical pilot study. We present here the results of this clinical study in HIV infected patients who had developed AIDS. They received a combination of vitamins and other essential nutrients for a period of four weeks. **None of the patients had received any ARV drugs before or during this nutritional program.**

The health of all patients significantly improved, including weight gain, decreased lymph node swellings, healing of ulcers and other signs of recovery. There was a dramatic improvement of the immune system. The blood test results conducted before and after four weeks of this nutrient synergy program showed significant increase in the body's defense cells, including lymphocytes, monocytes and other immune function cells,

THE INTERNATIONAL DRUG CARTEL IS RUNNING AMOK

Faced with these results of effective, safe and affordable natural therapies - excluding any ARV drugs - the pharmaceutical interests are now running amok. They not only fear the loss of a multi-billion market of ARV drugs - at stake is the entire credibility of their investment business.

THE PEOPLE AND THEIR GOVERNMENTS MUST ACT NOW!

The people of South Africa have to act now in support of their government. The pharmaceutical 'business with the AIDS epidemic' must be stopped and the scientific knowledge about safe and affordable natural means to fight the global HIV/AIDS epidemic must be implemented immediately.

The Dr. Rath Health Foundation protects its intellectual property in order to prevent it from being taken hostage by pharmaceutical investment interests. **However, this scientific knowledge is offered free to the government of South Africa as well as any other government in the world that is ready to implement it in the fight against the HIV/AIDS epidemic.**

Sincerely,

Nutrients Against AIDS!

World's first scientific and clinical evidence that micronutrients *alone* dramatically improve clinical conditions and immune function of HIV/AIDS patients, increasing white blood cells, lymphocytes, monocytes, T-cells and CD4 counts*

THE SCIENTIFIC EVIDENCE:

We conducted a clinical pilot study in HIV-positive patients with advanced AIDS. The goal of the study was to show that vitamins and other micronutrients *alone* reverse the course of AIDS, even in its advanced stage. Thus, it was essential that none of the patients had received any ARV drugs before or during this nutritional programme.

The nutrient programme consisted of vitamins, minerals, amino acids and certain other essential nutrients. Blood tests and clinical evaluations were performed at the start and after 4 weeks on the nutrient programme. The results of this pilot study were so profound after only one month that we decided to publish the data of the first 15 patients without delay. After the completion of the study a comprehensive report will follow.

Improvement in white blood cells and other immune function markers in 15 HIV/Aids patients taking nutrients - without ARVs - for 4 weeks:

White Blood Cells	+ 10 %
Lymphocytes	+ 38 %
Monocytes	+ 38 %
Total T-cells	+ 16 %
CD4 counts	+ 14 %

The more severe the AIDS condition was at the start of the study, the more the immune function markers improved.

Marieta (29) was beginning to show symptoms of full-blown AIDS with severe tumor-like swelling of the lymph nodes underneath her armpits, weight loss and hair falling out. She had been unable to work. Her CD4 count last December was 365. But she was not yet ready to take ARV drugs.

"After a week of using the nutrient programme, I regained my strength and went back to work. The tumors began to heal."

In early April she had another blood test taken. Her CD4 count had risen to 899, an increase of almost 150% in only 3 months!

"There is an alternative to ARV drugs and its working, I am the living proof that nutrients work," concludes Marieta.

The scientific responsibility of these results is shared by Alexandra Niedzwiecki, Ph.D. (Dr. Rath Research Institute, USA), David Rasnick, Ph.D. (Dr. Rath Health Foundation Africa), Sam Mhlongo, M.D. (Medical University of Southern Africa, South Africa) and Matthias Rath, M.D.

HELPING THE PEOPLE:

Last year, when Zola**(20) experienced symptoms of weight loss, sweating at night and coughing, she consulted her local clinic and was diagnosed with tuberculosis (TB) and also tested HIV positive.

She was advised that after finishing her TB treatment, she should start taking antiretroviral (ARV) treatment but she objected because of the side-effects of ARV treatment. By that time she had developed symptoms of full-blown AIDS, including a deep wound under her left ear. This wound would not heal and eventually a severe infection developed (see picture A below). The patient also had pain in her legs and other parts of her body.

Soon after she started the nutrient programme, the pains in her body stopped and she gained weight. The infected wound began to heal and after one month had almost completely disappeared (see picture B below). "I hated being around people, but now I have a positive outlook towards life," says Zola.

**** In order to protect the patient the name was changed.**

Zola's neck wound:

**A:
Before
the nutritional
programme:
Deep, infected
neck wound**

**B.
After 1 month
of daily
essential nutrients:
The wound is almost
completely healed**

The nutritional programme used in this study included the following key nutrients: Vitamin C, B and E (rich in oranges, mandarines and citrus fruits in general, also in tomatoes, apples, peppers, cabbage, corn and cereals); natural amino acids arginine and lysine (rich in milk, dairy products, fish, poultry); and polyphenols (rich in grapes and green tea).

The Puppets of the Drug Cartel in South Africa

Over the past months the Dr. Rath Health Foundation has unmasked the puppets of the pharmaceutical cartel operating in democratic South Africa. This 'drug cartel' was an economic backbone of the apartheid regime and its political stakeholders were sitting openly at the cabinet table of this regime. After the people of South Africa freed themselves from apartheid, these economic interests had to go

underground. However, they continued their unscrupulous 'business with disease' at the expense of health and lives of the people of South Africa.

Today, one of the most notorious puppets of the drug cartel is the **Treatment Action Campaign (TAC)**, which specifically targets poor communities as markets to push ARVs, the merchandise of its drug cartel funders.

The next puppet of the drug-cartel is the so-called DA, a political party that pushes drugs into South Africa under the deceptive name of **Democratic Alliance**. Challenged in court to reveal its sponsors, the DA refuses, desperately trying to prevent its exposure as a political front of pharmaceutical multinationals.

The **Advertising Standards Authority (ASA)**, a private com-

pany, has the Pharmaceutical Manufacturers Association as its major funder. Through this censorship agency the drug cartel bans information on natural non-patentable health throughout South African media that threaten the monopoly of the drug cartel.

The people of South Africa must raise their voice: There is no room for these organizations in democratic South Africa!

Pharmaceutical Multinationals

Misinformation - Deception - Censorship

People of South Africa

Half a century after the signing of the Freedom Charter in South Africa:

The Struggle for Freedom Continues!

The struggle to break the chains of pharmaceutical colonialism and for health freedom is not a national battle any longer - it is a struggle uniting all mankind. The South African government has taken the political lead in this international effort. The people of South Africa and the people of the world must support it now!

We must understand: The precondition for the elimination of HIV/AIDS and other diseases is the termination of the investment business profiting from the continuation and expansion of these epidemics. The rewards for the people of South Africa and the world for succeeding in this global effort will be breathtaking:

- Education in natural health create **FREEDOM** from drug dependency and health illiteracy!
- Planting and eating the right foods creates **FREEDOM** from hunger!
- Knowing natural ways to stay healthy provides **FREEDOM** from disease!
- Helping to spread this life-saving information will create jobs and provide **FREEDOM** from unemployment.

THE TIME TO ACT IS NOW! YOU CAN!
