

George Bush - Do Not Start World War III

The world is on the brink of World War III. Never before in history has a war with weapons of mass destruction been so likely than in the next few weeks. The greatest threat to trigger such a war does not come from a group of terrorists hidden in the Hindu Kush mountains. It comes from the Bush administration. For the next four weeks, no one anywhere in the world has a greater interest in an escalating international crisis and a new war than the Bush administration.

The Bush administration has a problem that it cannot solve in any other way: the imminent breakdown of the multi-trillion dollar pharmaceutical industry from an avalanche of product liability lawsuits.

The withdrawal of Merck's Vioxx because of fatal side effects in potentially tens of thousands of patients is just the beginning. Almost all synthetic pharmaceutical drugs have life-threatening side effects, and their manufacturers will eventually have to pay hundreds of billions of dollars in damages to drug-injured patients and their families.

The class action lawsuits against the pharmaceutical industry will dwarf those brought against the tobacco industry for the harm cigarette smoking did to the health of millions of people and to the economies of entire states.

Already now, millions of patients across America have lost confidence in pharmaceutical drugs, and their doctors are asking urgent questions of the drug makers. The full scale of this imminent collapse is revealed by the following fact: According to the *Journal of the American Medical Association* of April 15, 1998, the known deadly side effects from pharmaceutical drugs were then already the fourth leading cause of death in America.

Thousands of future lawsuits against drug makers will unmask the financial interest groups behind the pharmaceutical investment business. It will be found that the pharmaceutical industry is no health industry, but an investment business. Its business strategy is a giant fraud scheme: While it deceptively promises health to millions of people, the return on investment of this industry depends on the continuation and expansion of diseases. Vioxx is not the exception: it is the rule.

These lawsuits will also reveal that the financial interest groups behind this drug investment business have systematically sought to discredit and even outlaw effective and safe natural health therapies for one reason only: they are not patentable, and they threaten the pharmaceutical investment business based exclusively on patented synthetic drugs.

These lawsuits will open the eyes of the people of America and the entire world to the fact that for a century, millions of people in America and billions around the world have unnecessarily died for one reason only: the financial greed of the special interest groups that the Bush administration represents.

To make things worse, the pharmaceutical industry was the largest corporate sponsor of Bush's presidential election campaign with a clear mandate: to protect it from product liability lawsuits at all costs. Under the deceptive cover of "medical liability reform" and hidden within the "Patriot Act," the Bush administration tried to deliver this "survival kit" to the drug business. But the people of America did not fall for this unscrupulous plan.

Now the worst nightmare has come true for the Bush administration and the special interests it represents. Left without an umbrella of protectionist laws, the drug industry that has maintained diseases among millions of people for the financial gain of a few will finally be terminated by its victims.

Only in the shadow of a tragedy surpassing the horror of 9/11 by an order of magnitude can the Bush administration hold on to power - even without elections. And its first "martial law" will be a "drug maker survival kit," protecting the drug cartel from patient lawsuits.

QUESTIONS TO GEORGE BUSH

George Bush, you have to answer some urgent questions for the American people and the world:

- Why do you protect an industry that is responsible for the deaths of millions of people in America?
- Why do you divert billions of tax dollars assigned to improve the health of your countrymen into the pockets of drug billionaires making their fortunes from the continuation of preventable diseases?
- What will be your plan to avert the collapse of the drug industry after the Merck/Vioxx scandal?
- Did you not learn in early August 2001 that the pharmaceutical giant Bayer had to withdraw its flagship drug Baycol because of its deadly side effects? Didn't you know what everybody else did, that ruinous lawsuits were being filed against Bayer and other major drug companies?
- And, in the middle of this crisis for the drug industry, on August 5, 2001, didn't you receive the now infamous Presidential Daily Brief, "Bin Laden to Attack the United States"? Why did you decide to do nothing?
- Why were the ongoing FBI investigations in Summer 2001 "blocked at the highest level"?
- Were you deliberately allowing this tragedy to happen to create a media diversion to ensure the survival of the sinking pharmaceutical investment business?
- With your conduct already exposed by the 9/11 Commission, what will the American people say now that they have learned about your motives?
- With an even bigger threat now posed to the survival of the drug business, are you planning an even bigger scam than you pulled over 9/11?
- Are you really ready to sacrifice the lives of millions of people in a world war launched in the interest of the pharmaceutical investment industry you represent?

INSTRUCTIONS TO GEORGE BUSH

Here is what you will do, George Bush:

1. You will not risk another tragedy like 9/11 happening again to draw public attention away from the meltdown of the fraudulent "business with disease."
2. You will distance yourself from the contingency plans of Attorney General John Ashcroft, who in July of this year already started preparing to cancel the November elections under the pretense of a so-called "emergency." Your administration will not seize dictatorial power through a "coup d'etat" and without any democratic legitimation based solely on the dubious provisions of the Patriot Act.
3. You will instruct the FBI, the Homeland Security Office and other agencies in the United States not to trigger a crisis or panic the American people through open or covert actions.
4. You will instruct the CIA not to be involved in covert actions in other countries, triggering international crises or wars.
5. You will not attack Iran, North Korea or any other country with nuclear weapons or other weapons of mass destruction under any pretense.
6. You will instruct your ally Ariel Sharon not to escalate the conflict in the Middle East into a regional war involving weapons of mass destruction.
7. You will go to your history library and learn a lesson from 1933: Another ruler representing the giant drug and oil cartel IG Farben used the destruction by arson of the German parliament, the Reichstag, as a pretense to seize dictatorial power and to drag the entire world into World War II.
8. You will not start World War III as a smoke screen to prevent the demise of the fraudulent drug business. No one will suffer from its collapse. To the contrary,

Dr. Matthias Rath

Over the past two years, Dr. Matthias Rath has consistently exposed the pharmaceutical industry as the largest corporate beneficiary of the war against Iraq and the "war against terror" led by the Bush administration.

Everything Dr. Rath has predicted has come true. For three years, these wars have effectively diverted public attention from the near collapse of the drug investment business brought about by the withdrawal of Bayer's deadly cholesterol drug Baycol in August 2001. Now the withdrawal of Merck's Vioxx has started the final meltdown of the trillion-dollar drug business fraud.

In 2001, the collapse of the entire drug investment business was delayed by the occurrence of the 9/11 tragedy. Now nothing can delay its disintegration any longer - other than a catastrophe to dwarf the tragedy of 9/11.

The only option for the Bush regime to ensure the survival of the drug industry that brought it to power is to stage an international crisis or war involving weapons of mass destruction.

With World War III being perhaps only days away, Dr. Rath again raises his voice to prevent it.

millions of lives will be saved by it.

9. After the November elections you will quietly pack your things from the White House and disappear to your ranch in Texas. There you will quietly remain until you and your administration are called to trial for violations of national and international law.
10. You will only reappear on the world stage when prosecuted before an International Criminal Court for the crimes against humanity committed by you and your administration.

The people of America and the world will not allow you and your administration to lead the world into a global disaster with millions of deaths.

With the exposure of your real motives through this public notice, your game is up. Even if you dare to pull the trigger, the entire world will be pointing at you.
