

Bush and Cheney Prepare For Nuclear War Before November 4! Yes, We Can Prevent Their WWII Plans!

Over the past five years Dr. Rath has unrelentingly raised his voice in public alert ads

Matthias Rath, M.D.

in the New York Times with one goal: To prevent the Bush administration from using already the Iraq War as a launching pad for WWII. The public exposure of these plans was an important factor that they could not be executed (www.roadmap-to-health.org).

For the exposure of the world's largest oil and drug cartel (IG Farben) behind the Nazi attempt of world conquest during World War II, the Dr. Rath Foundation has been awarded the "Relay of Life Award" from Auschwitz survivors (www.profit-over-life.org).

THE END OF A TYRANNY

The era of the tyranny of the oil and drug cartel is ending. The first mass production of hydrogen cars – fueled only by water – shows everyone that water energy can also run trains, heat homes and illuminate cities. In medicine, effective, safe and affordable therapies are replacing tainted statins and toxic “chemo-therapies.”

These scientific advances are threatening the multi-billion dollar investment business with oil and patented drugs. Under threat of extinction, the oil and drug cartel tries to cement its global rule.

THE THREAT OF CHANGE

The “movement of change” in the US will accelerate the end of the global tyranny of this cartel. Faced with that perspective the investment groups behind the oil and drug business are uniting behind John McCain as their candidate. But that is not all.

Only if the Bush administration or their allies launch a nuclear war in the next 4 months could the global rule of these interests prevail. Under the horror and martial laws of World War III the oil and drug cartel would cement its dictatorial rule for generations to come.

THE FRENCH CONNECTION

With the shift in US politics, the oil and drug cartel has strategically developed a “French Connection”. In another nuclear power, France, it brought Sarkozy and his deputy Kouchner to power as strategic alternates for Bush/Cheney. All four of them already announced publicly their readiness to launch WWII.

Until November 4, these stalwarts of the cartel will be desperate to ignite WWII by authorizing a nuclear attack on Iran. Not since the Cuban Missile Crisis has the world been in greater danger than now!

NOW YOU MUST ACT!

“Plan A” of the cartel was to use the Iraq War as a launching pad for WWII. The exposure of this plan in public alert ads in the New York Times and elsewhere prevented that we are living already in a post-nuclear war era. Without this civil courage there would be no “movement of change.”

If this movement wants to achieve its goals it must speak out now against the immediate danger of a nuclear war. Indifference will inevitably cause its disappearance under a thick layer of post-nuclear war martial laws.

Iraq War: www.roadmap-to-health.org
World War II: www.profit-over-life.org

The facts, motives and plans of the oil and drug cartel should be obvious to everyone. Now you need to speak up!
