

President Obama, You Must Wake Up America!

Dr. Matthias Rath

Dr. Rath has become a voice of conscience exposing the plans of the Oil and Drug Cartel behind recent global military conflicts and crises. Attacked by Cartel media the world over (www.wiki-rath.org), Dr. Rath and his Foundation have received prestigious awards for civil courage. The 'Relay of Life' Award (www.relay-of-life.org) from survivors of Auschwitz and other Nazi concentration camps was conferred with a clear mandate:

'Never again!'

The Goals of This Publication

1. This information alerts the people of America that the radicalization of society and the polarization of political life is organized and financed by the Oil and Drug Cartel – with the goal to regain control over the White House and the country.
2. It exposes the 'Tea Party' and other so-called 'grassroots' movements as agents of the Oil and Drug Cartel.
3. It reveals the strategic aim of these groups: the destabilization of the democratically elected government by instigating civil unrest – under the pretext of defending constitutional rights and carrying out the will of God.
4. It exposes the frenzied attacks against the Obama health care plan – that promotes preventive and community-based health – as a maneuver to protect the economic privileges of the Drug Cartel and its multi-trillion dollar health care monopoly based on patented pharmaceutical drugs.
5. It exposes all these tricks and maneuvers as blatant copies of the Oil and Drug Cartel's take-over of Germany in the 1930s – with the help of their political stakeholders, the Nazis.
6. Sharing these historical parallels with the American people, will allow them to recognize the criminal historic record of the Oil and Drug Cartel as well as the deceptive strategies it has used throughout history. The message: 'They've done it before!'
7. With this knowledge, the American people have a clear choice for the coming elections.
8. It gives the Republican party a choice too: stay committed to democracy – or go into oblivion as political puppets of the Cartel's corporate dictatorship plan.
9. It allows the people and governments of the world to focus their resources on development and the construction of a modern world based on affordable renewable energy and science-based natural health.
10. The dissemination of this message is a precondition for protecting democracy in America and lasting peace!

AMERICA AT THE CROSSROADS

Over the past two years, the social and political life in America has been radicalized and polarized in an unprecedented way. What appears as a 'grass-root' movement articulating anger towards the current government is, in fact, a strategically implemented campaign by special interests, namely the Oil and Drug Cartel, to regain control over the White House and the country.

Worse, fighting a battle for survival of its outdated technologies, these special interests can no longer survive in a democracy and must seek dictatorial powers. In this historic situation, the only way to protect democracy is to expose the historic record of the Cartel.

In Open Letters on July 16 and September 13, 2010, I have exposed in this newspaper the historical parallels between the political escalation in Germany in the 1930's and that of the US today. Then and now, the Cartel financed the political destabilization of democracy, with the goal of replacing it with a corporate dictatorship.

In Germany, then, the Cartel succeeded in seizing power and launching WWII because people and politicians around the world ignored the early warning signs. In the USA, today, the Cartel has launched an all-out psychological war. Organizations like the 'Tea Party' are radicalizing society. The only way derail their plan of destroying democracy is to expose the criminal history and the motives of these special interests.

GLOBAL DIMENSION OF THIS THREAT

New technologies in the area of energy and health threaten the multi-trillion dollar global monopolies of the Oil and Drug Cartel. The Cartel's giant markets of outdated technologies are no longer compatible with democracy and can only be maintained in a global dictatorship of corporate interests.

A first step in the direction of establishing such a global corporate dictatorship has already been made. The recently founded so-called 'European Union' in Brussels (the 'Brussels EU') is not a democratically elected or legitimized body. The so-called 'EU-Commission' – 27 technocrats appointed by Cartel interests – decide about the lives and fates of 500 million people across Europe by means of dictatorial 'directives' and 'regulations'.

Largely unbeknown to the rest of the world, the so-called 'European Parliament' has no right of legal initiative and serves merely as a fig-leaf for the this 'Cartel Commission'.

Even more appalling is the fact that the entire 'Brussels EU' structure is the implementation of plans conceived before and during WWII by the Oil and Drug Cartel and their Nazi stakeholders. The goal then and now was to cement their economic rule by means of a 'Central Cartel Office' that determines essentially every aspect of life in Europe and eventually the rest of the world.

The historical facts and documents are available online at www.Nazi-Roots-Of-Brussels-EU.org.

THE STRATEGIC ROLE OF THE USA

However, the key country in the Cartel's 'survival strategy' is the USA. Not only is the US the home base of most Oil and Drug corporations, it is also the strongest military power to de-

They've Done It Before – They Try It Again Today!

The goal of the special corporate interests – namely the Oil and Drug Cartel – in the US today is to transform the democratic society into a corporate dictatorship where these corporate interests exert direct control over the political executive and the entire country.

Towards this end they instigate the radicalization of society and finance the election campaigns of their political stakeholders. This strategy is an exact copy of the Oil and Drug Cartel's take-over of Germany in 1933 – a strategy executed with the help of the Cartel's political and military stakeholders, the Nazis.

defend these special interests. A major setback for the Cartel was the fact that in 2008 the American people elected a President on a platform of ending the 'tyranny of oil' and of reforming health care, including a focus on prevention.

In order to reverse this vote, the Cartel must not only regain control of the US government but must try to fundamentally 're-program' the American people by financing the dissemination of doubt and deception. Towards this end, the Cartel has been mobilizing an army of stakeholders in the media and politics.

LESSONS OF HISTORY: FROM 1933 TO 2010

The blueprint for this strategy of radicalizing society in preparation for war was pre-WWII Germany. The unobstructed implementation of this strategy in 1933 led to the overthrow of

democracy, the installation of a dictatorship on behalf of the Oil and Drug Cartel – and eventually, to a military attempt to expand its global markets during WWII.

The records of the Nuremberg War Crimes Tribunal and of US Congress unequivocally document (profit-over-life.org) that WWII was launched in the interest – and with the financial as well as technical support – of the German-based Oil and Drug Cartel (Bayer, BASF, Hoechst). Its goal was to seize control of the multi-trillion dollar global markets of oil, patented chemicals and drugs.

movement – the 'brownshirts'. The systematic instigation of hatred, aggression, racism and other forms of psychological terror by the 'brownshirts' in pre-war Germany was the precondition for the next stage: the mass murder across the globe by the SS and German Wehrmacht in the Cartel's attempt to control the world.

After WWII, the German Oil and Drug Cartel was dismantled and its shares transferred to US- and UK-based multinational oil and drug corporations. The Cartel's criminal past was deliberately hidden from the public for one main reason: not to endanger its future attempts at world control.

1933 and Today: The Cartel Manipulates Public Opinion

Germany 1933

In the 1930s, the radicalization of German society and growing physical violence against religious minorities and political opponents of the Nazi regime strategically prepared the seizure of power by the Coalition of the Oil and Drug Cartel with the Nazis.

USA Now

Today, the political climate in the USA is strategically poisoned by the stakeholders of the same special interests, namely the Oil and Drug Cartel. Physical violence against political opponents is increasingly replacing the political and social dialogue.

In WWII, the Cartel and their Nazi accomplices dressed millions of German soldiers in a uniform that carried the allegedly divine blessing for the Nazi/Cartel global conquest.

Harnessed with a belt buckle showing the Swastika and the slogan 'God With Us' ('Gott mit uns'), the Nazi/Cartel Wehrmacht inflicted death on tens of millions of people.

Today, the stakeholders of the Oil and Drug Cartel in politics and media are trying to lure the American people with deceptive slogans like 'restoring honor' and under the pretext of acting in the name of God.

In the course of history, no name has been more abused to mask the greed of special interests than the name of 'God'.

President Obama, you have the historic responsibility to disseminate this information to the American people in order to enable them to actively defend freedom and democracy.
